

BEVERAGES

November 2024

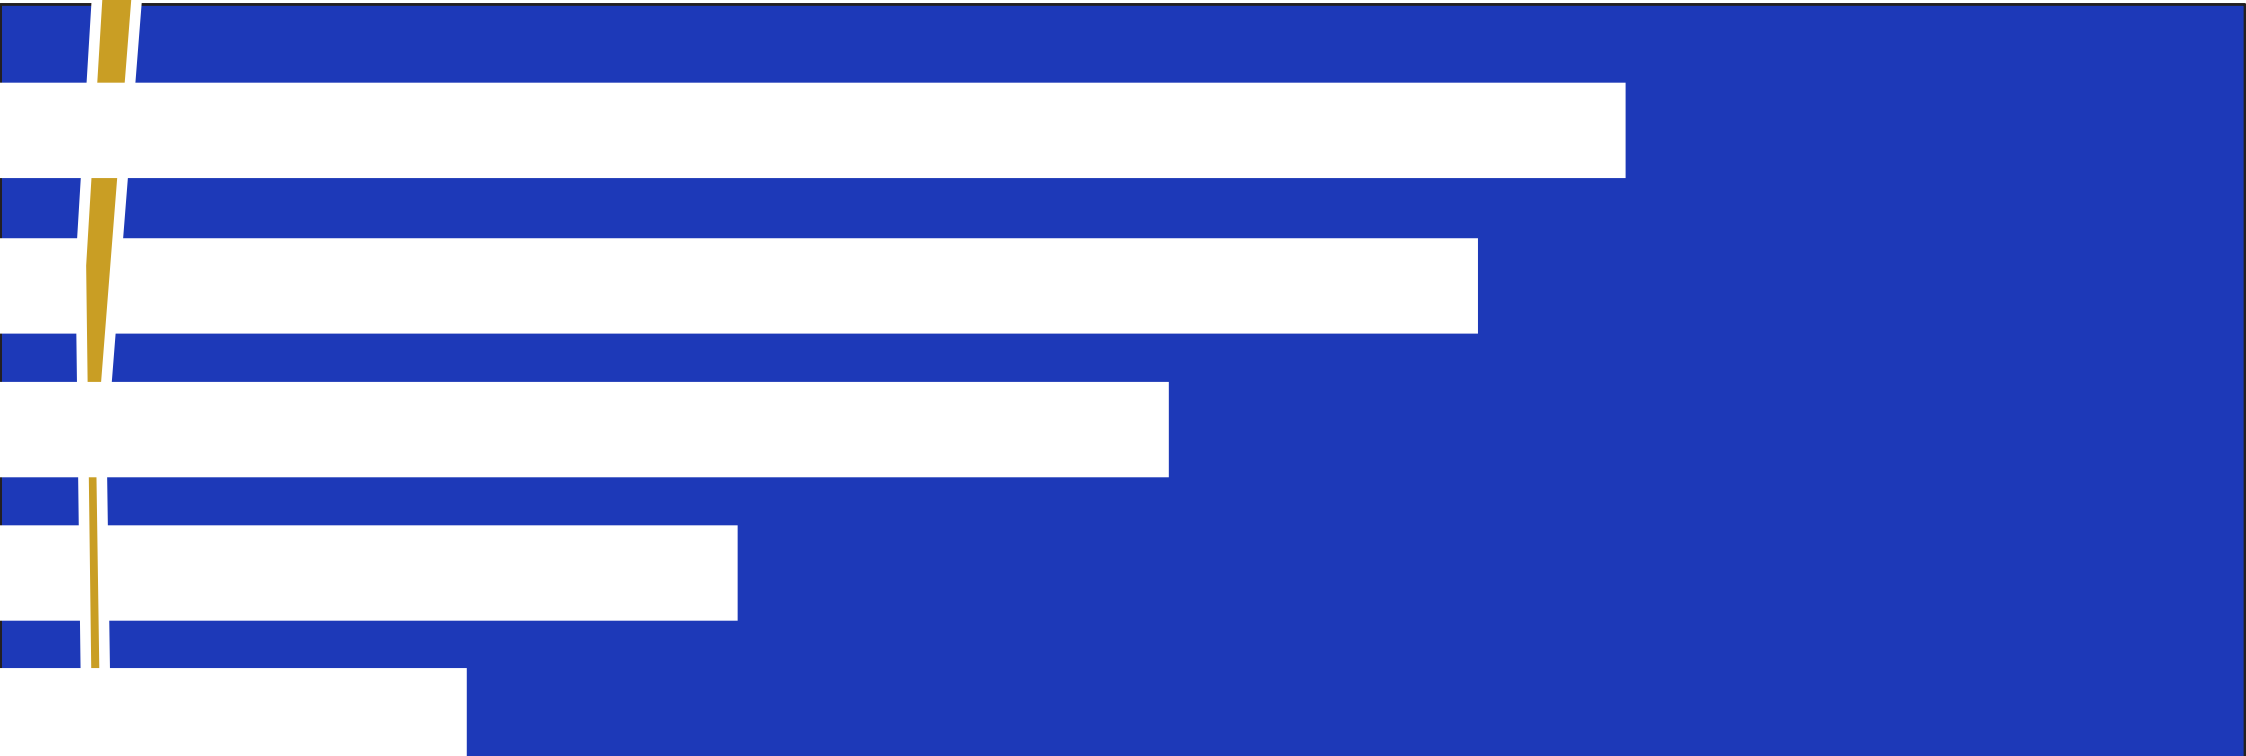

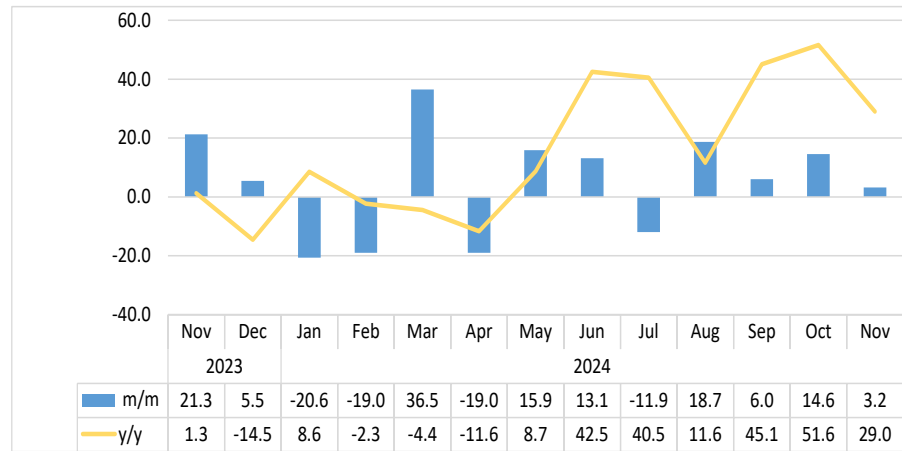

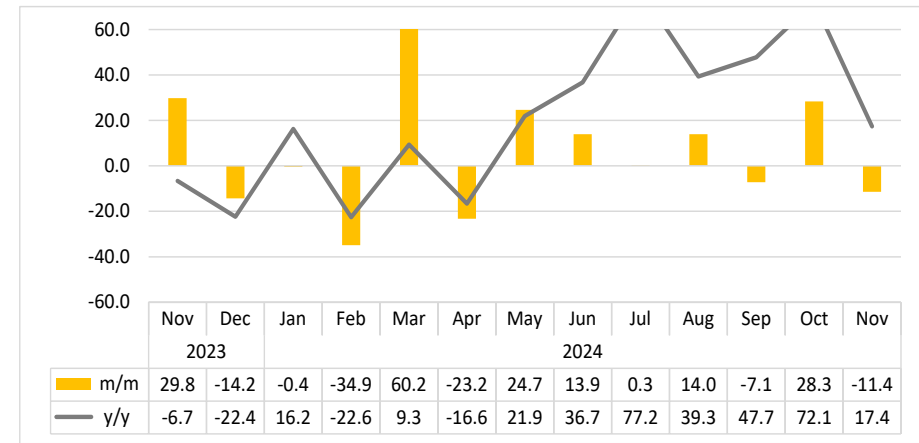

Chart 1: Beverage Production Composite Index, Percentage Change

- The **Beverage Production Composite Index**, which is composed of alcoholic and non-alcoholic beverages, increased by 3.2 percent in November 2024, a slowdown compared to the 14.6 percent growth recorded in the preceding month. Year-on-year, the index grew by 29.0 percent (Chart 1).
- The monthly growth was driven by higher production levels of non-alcoholic beverages, which surged by 26.5 percent.
- In terms of volume, beverage production stood at 429 576 hectolitres in November 2024, higher than the 416 270 hectolitres recorded in October 2024 and the 332 971 hectolitres produced in November 2023.

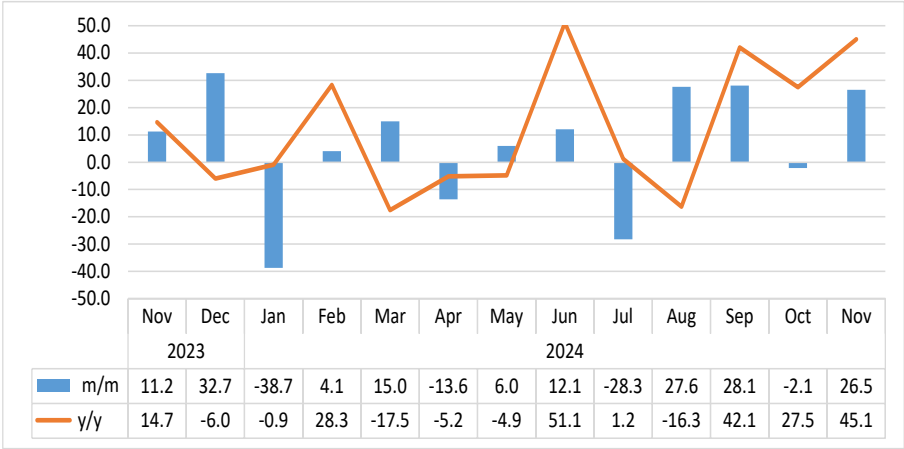

Chart 2: Alcoholic Beverage Production Index, Percentage Change¹

- The **Alcoholic Beverage Production Index** decreased by 11.4 percent in November 2024, following a 28.3 percent growth recorded in October 2024. Year-on-year, the index increased by 17.4 percent (Chart 2).
- Total alcoholic beverage production for the month under review was 226 511 hectolitres, lower than the 255 742 hectolitres produced in October 2024, but higher than the 192 982 hectolitres produced in November 2023.

¹ Chart 2 is limited to 60 percent for better readability.

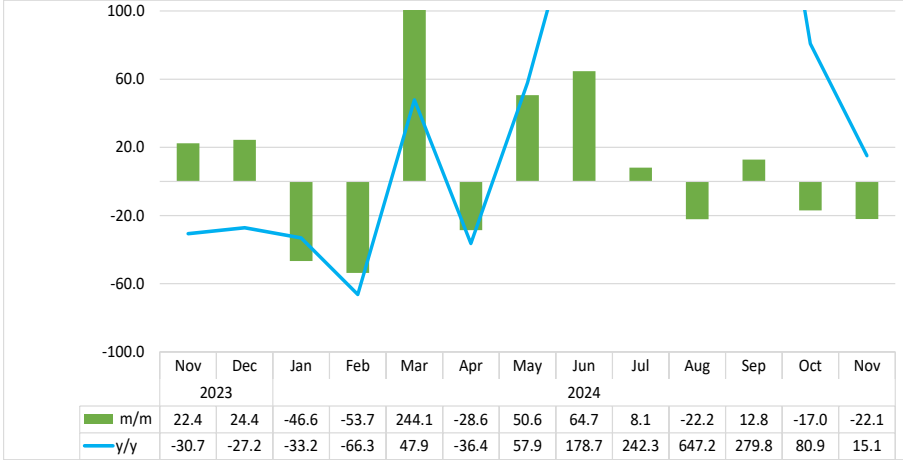

Chart 3: Non-Alcoholic Beverage Production Index, Percentage Change²

- The **Non-Alcoholic Beverage Production Index** rebounded with 26.5 percent increase in November 2024, recovering from a 2.1 percent decline registered in the previous month. The index also surged by 45.1 percent year-on-year (Chart 3).
- In absolute terms, 203 065 hectolitres of non-alcoholic beverages were produced in November 2024, up from 160 528 hectolitres noted in October 2024 and 139 989 hectolitres recorded in November 2023.

² Chart 3 is limited to 50 percent for better readability.

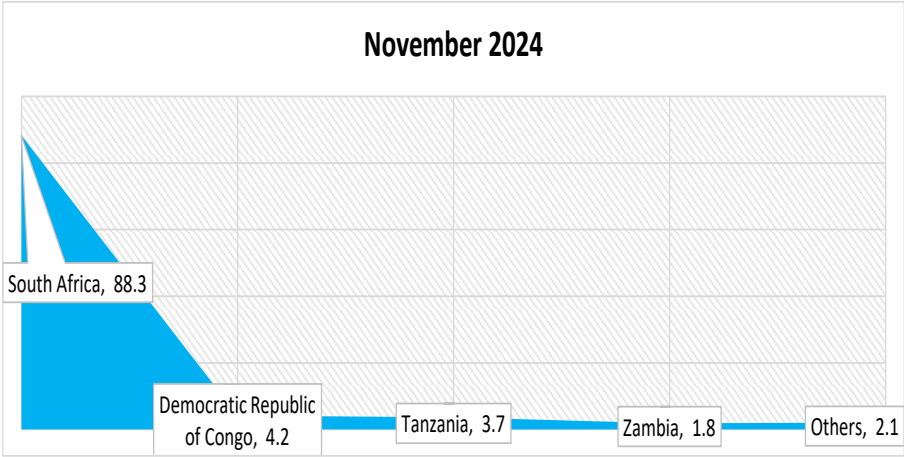

Chart 4: Beverage Export Composite Index, Percentage Change³

- The **Beverage Export Composite Index** declined by 22.1 percent in November 2024, following a 17.0 percent decrease registered in October 2024. Year-on-year, however, the index rose by 15.1 percent (Chart 4).
- During the month under review, 37 173 hectolitres of beverages were exported, lower than the 47 720 hectolitres exported in October 2024, but higher than 32 295 hectolitres exported in November 2023.
- Of the total, alcoholic beverages accounted for 36 898 hectolitres, with beer contributing 93.3 percent (34 430 hectolitres).

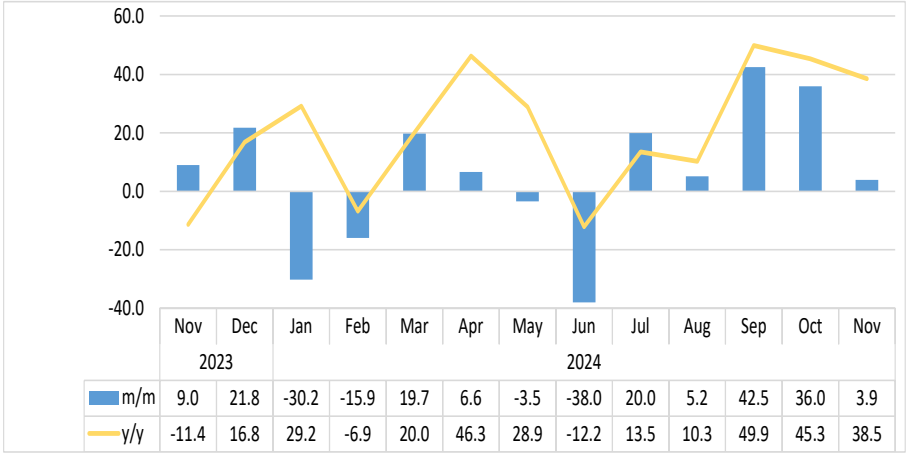

³ Chart 4 is limited to 100 percent for better readability.

Chart 5: Export of Beverage by Partner Country, Percentage Share

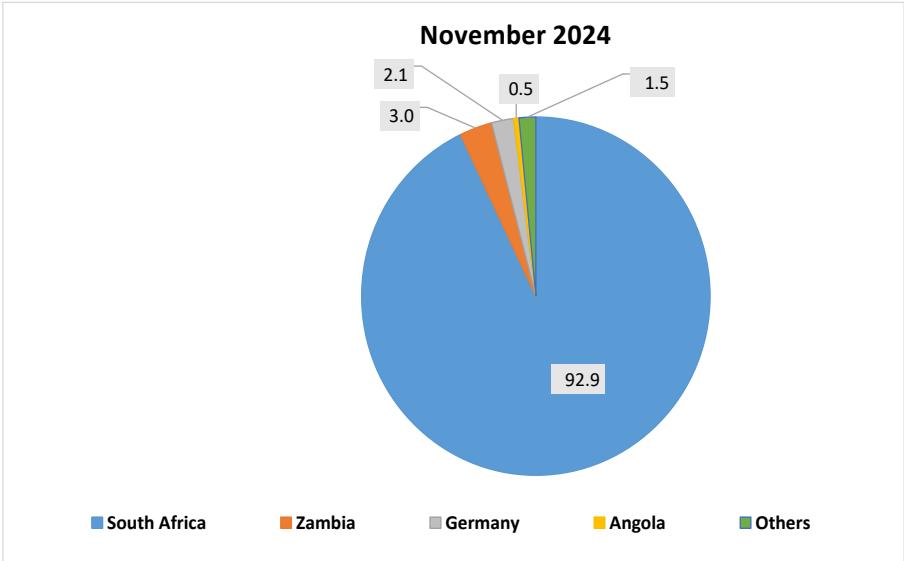

- South Africa remained Namibia's largest export market for beverages, accounting for 88.3 percent of the total beverage export. The Democratic Republic of Congo (DRC) followed in second position with a 4.2 percent share, Tanzania ranked third at 3.7 percent, while Zambia rounded out the top four with a share of 1.8 percent.

Chart 6: Beverage Import Composite Index, Percentage Change

- The **Beverage Import Composite Index** grew by 3.9 percent in November 2024, slowing from a 36.0 percent increase recorded in October 2024. Year-on-year, the index rose by 38.5 percent (Chart 6).
- Namibia imported 177 848 hectolitres of beverages in November 2024, up from 171 152 hectolitres registered in October 2024 and 128 368 hectolitres recorded in November 2023.

Chart 7: Import of Beverage by Partner Country, Percentage Share

- South Africa remained the dominant source of Namibia’s beverage import during November 2024, claiming a share of 92.9 percent of total beverage import. Zambia followed with a share of 3.0 percent, while Germany and Angola grabbed shares of 2.1 percent and 0.5 percent, respectively (Chart 7).

Table 1: Beverage Production Index

Year	Month	Alcoholic Beverages production index	Non-Alcoholic Beverages production index	Composite production Index

Methodology:	Graphical and tabular analysis
Data Sources:	The data sources for volume in Hectolitres of beverage are sourced from Namibia Breweries, Coca-Cola Namibia Bottling Company, ABInBev Namibia (SAB Miller Namibia at Okahandja) and Trade data from NamRA. This is data on the production of alcoholic beverage (beer production) and non-alcoholic beverage (soft drinks). Alcoholic beverage production is the total of alcoholic beverage produced by Namibia Breweries and ABInBev Namibia. Whereas non-alcoholic beverage production data was a sum of soft drinks produced by Namibia Breweries and Namibia Beverage. The unit of measure is Hectolitre (hl).
Base year:	The beverage sectoral report is harmonised with the quarterly and annual National Accounts base year 2015.
Index calculations:	The index of beverage production was weighted using the volume data of 2015. The index is then calculated as a ratio of the volume of a specific component in a specific month to the total volume of that component in 2015.
Conversion:	1 basis point = 0.01 percent
Revision:	Data was revised based on the new dataset received from the data sources.
