

BEVERAGES

APRIL 2025

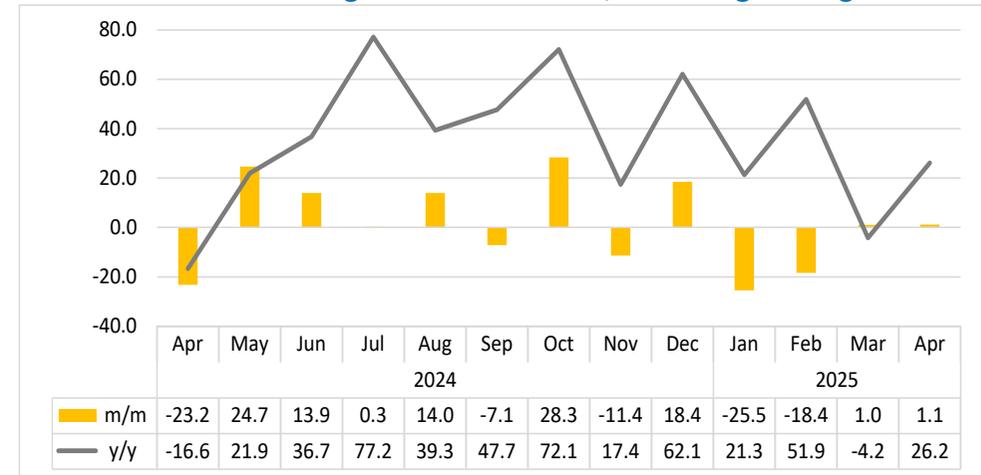

Chart 1: Beverage Production Composite Index, Percentage Change

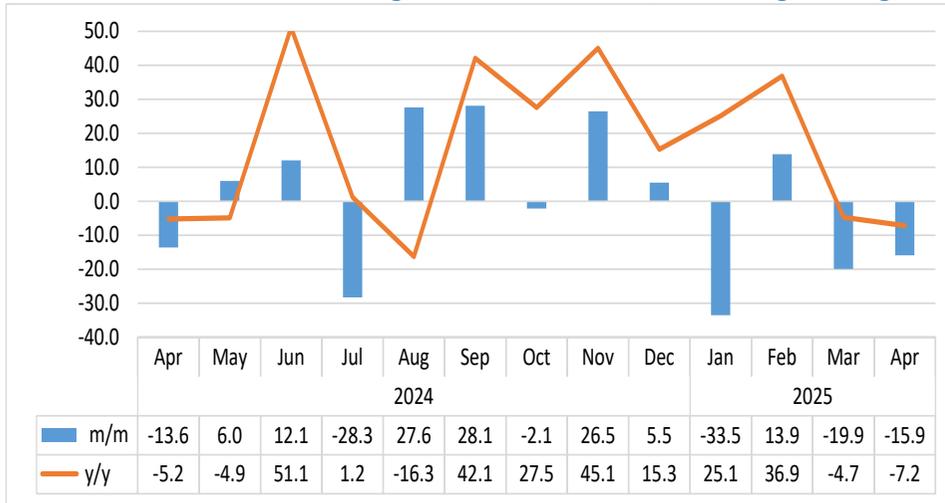

- **Beverage Production Composite Index**, which is composed of alcoholic and non-alcoholic beverages, declined by 6.3 percent in April 2025, compared to a contraction of 9.4 percent posted in March 2025. On the other hand, the index posted an increase of 10.5 percent, year-on-year (Chart 1).
- The month-on-month decline is attributed to lower production levels of non-alcoholic beverages.
- In terms of volume, beverage production stood at 276 012 hectoliters in April 2025, which is lower than 294 705 hectoliters but higher than 249 890 hectoliters recorded in March 2025 and in the corresponding month of 2024, respectively.

Chart 2: Alcoholic Beverage Production Index, Percentage Change

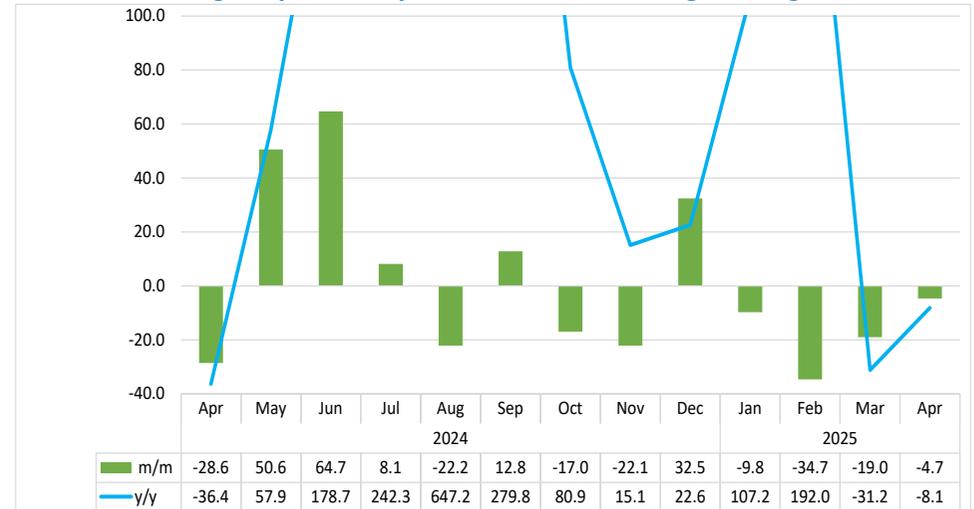

- **Alcoholic Beverage Production Index** increased by 1.1 percent on a monthly basis in April 2025, compared to a growth of 1.0 percent registered a month earlier. Additionally, on an annual basis, the index grew by 26.2 percent (Chart 2).

Chart 3: Non-Alcoholic Beverage Production Index, Percentage Change¹

- **Non-Alcoholic Beverage Production Index** declined by 15.9 percent on a monthly basis in April 2025, compared to a reduction of 19.9 percent recorded in March 2025. Similarly, the index contracted by 7.2 percent year-on-year (Chart 3).

Chart 4: Beverage Export Composite Index, Percentage Change²

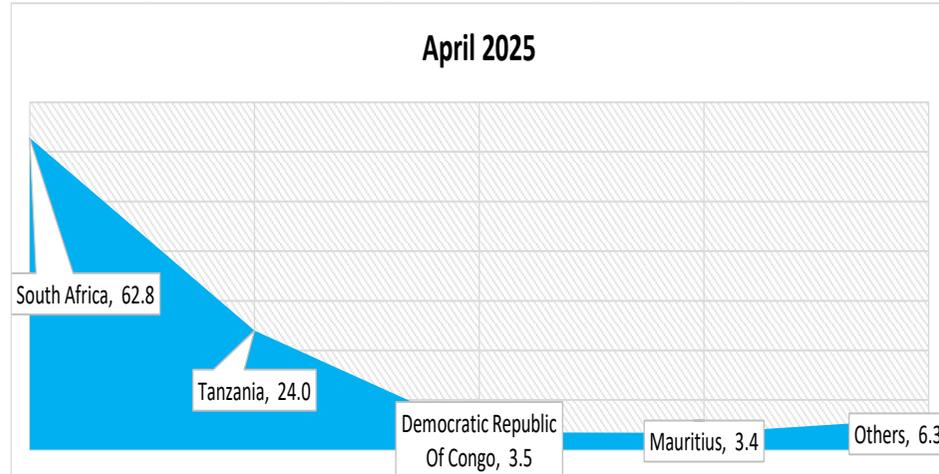

- The **Beverage Export Composite Index** contracted by 4.7 percent in April 2025, compared to a decline of 19.0 percent registered in the preceding month. Year-on-year, the index contracted by 8.1 percent (Chart 4).
- During the period under review, 22 416 hectoliters of beverages were exported, which is lower than the export in the preceding month of 23 512 hectoliters and 24 405 hectoliters exported in April 2024, respectively.

¹ Chart 3 is limited to 50 percent for better readability.

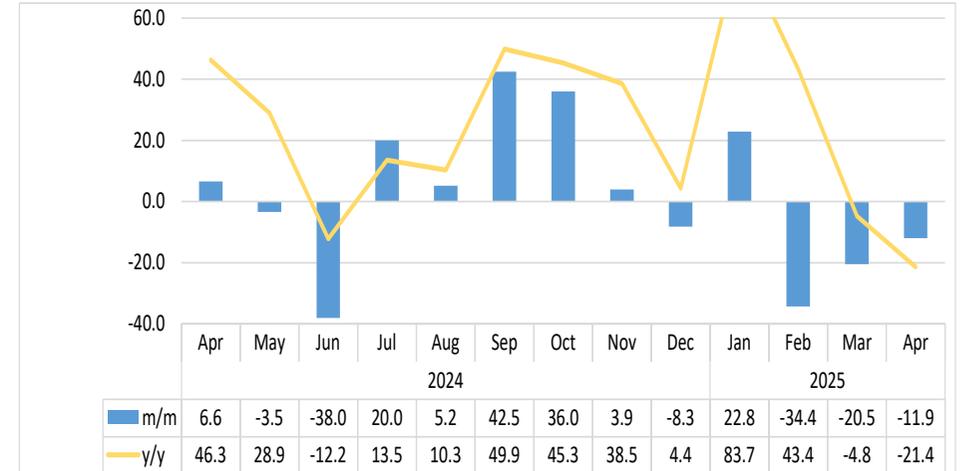

² Chart 4 is limited to 100 percent for better readability.

Chart 5: Export of Beverage by Partner Country, Percentage Share

- During the period under study, South Africa remained Namibia's largest export market for beverages in hectoliters (HL), accounting for 62.8 percent of the total beverage exports. In the second position was Tanzania with 24.0 percent, followed by the Democratic Republic of Congo in third place with 3.5 percent share, while Mauritius came last in the top four with a 3.4 percent share.

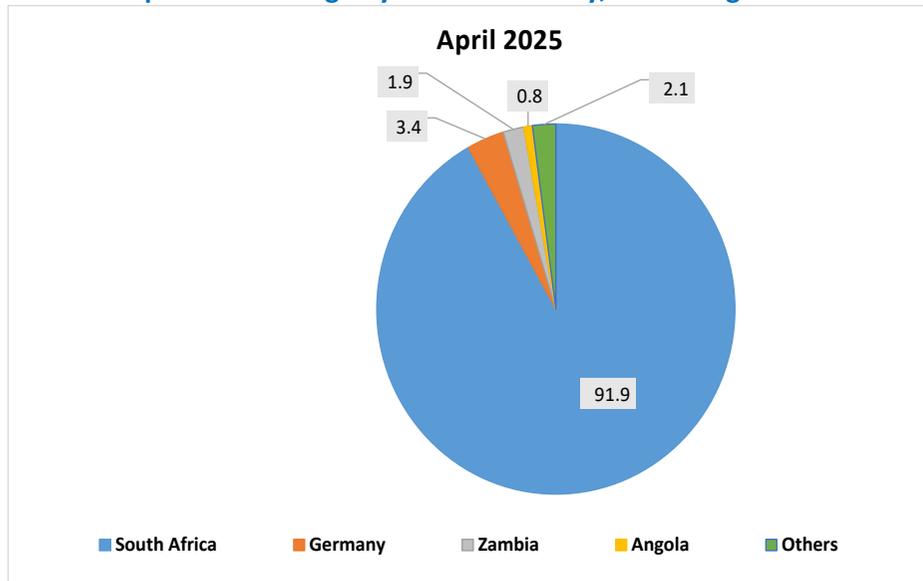

Chart 6: Beverage Import Composite Index, Percentage Change³

- The **Beverage Import Composite Index** contracted by 11.9 percent on a monthly basis in April 2025, an improvement when compared to a decline of 20.5 percent witnessed in March 2025. Furthermore, the index reduced by 21.4 percent year-on-year (Chart 6).
- Namibia's imports for beverages stood at 92 067 hectolitres in April 2025, this is a reduction when compared to 104 559 hectoliters of beverages imported in March 2025, while 117 071 hectolitres were imported in the corresponding month of 2024.

³ Chart 6 is limited to 60 percent for better readability.

Chart 7: Import of Beverage by Partner Country, Percentage Share

- In April 2025, South Africa continued to be the primary source of Namibia’s beverage imports by volume, with a share of 91.9 percent of the total beverages imported. Germany was the second-largest supplier with a share of 3.4 percent, followed by Zambia and Angola in third and fourth place with shares of 1.9 percent and 0.8 percent, respectively (Chart 7).

Methodology:	Products are classified according to the Harmonized System (HS) nomenclature classification (Manufacture of Beverages) and using graphical and tabular analysis.
Data Sources:	The data sources for volume in Hectolitres of beverage are sourced from Namibia Breweries, Coca-Cola Namibia Bottling Company, ABInBev Namibia (SAB Miller Namibia at Okahandja) and Trade data from NamRA. This is data on the production of alcoholic beverage (beer production) and non-alcoholic beverage (soft drinks). Alcoholic beverage production is the total of alcoholic beverage produced by Namibia Breweries and ABInBev Namibia. Whereas non-alcoholic beverage production data was a sum of soft drinks produced by Namibia Breweries and Namibia Beverage. The unit of measure is Hectolitre (hl).
Base year:	The beverage sectoral report is harmonised with the quarterly and annual National Accounts base year 2015.
Index calculations:	The index of beverage production was weighted using the volume data of 2015. The index is then calculated as a ratio of the volume of a specific component in a specific month to the total volume of that component in 2015.
Conversion:	1 basis point = 0.01 percent
Revision:	Data was revised based on the new dataset received from the data sources.
