

ELECTRICITY

JUNE 2025

Chart 1: Electricity Sources Composite Index, Percentage Change

- The **Electricity Sources Composite Index**, which comprises both own generation (local production) and imports, recorded a decline of 3.9 percent in June 2025, reversing the 12.9 percent increase observed in the previous month. However, on a year-on-year basis, the index increased by 14.5 percent (see Chart 1).
- In June 2025, a total of 417 049 MWh of electricity was supplied to the domestic economy, lower than the 434 154 MWh recorded in the preceding month, but higher than 364 167 MWh supplied in the same month of 2024.

Chart 2: Share of Sources of Electricity, in Percent

- Own generation provided 54.2 percent (225 897 MWh) of the total electricity supplied to the domestic economy in June 2025, while imports accounted for the remaining 45.8 percent (191 153 MWh). This distribution contrasts with June 2024, when imports represented the dominant share of electricity supply.

Chart 3: Share of Electricity for Own Generation, in Percent

- In June 2025, total local electricity generation stood at 225 897 MWh. The Ruacana Hydro Power Station was the leading source, contributing 87.4 percent (197 521 MWh), followed by Independent Power Producers (IPPs), which supplied 10.2 percent (23 034 MWh). The Omburu PV Solar Power Station generated 1.9 percent (4 209 MWh) of the total local output.
- Additionally, the Anixas 2 Diesel Power Station ranked fourth, supplied 0.4 percent (840 MWh) of the total local generation (see Chart 3).

Chart 4: Electricity Import Index, Percentage Change¹

- The **Electricity Import Index** rose by 23.6 percent in June 2025 on a monthly basis, reflecting a slowdown from the 37.3 percent growth recorded in the previous month. On a year-on-year basis, the index declined by 9.8 percent (see Chart 4).
- South Africa was the primary source of electricity imports, accounting for 51.3 percent of the total import electricity, followed by Zambia with a 35.2 percent share. Zimbabwe accounted for 6.0 percent, while Eskom Orange River and the Day Ahead Market-SAPP ranked fourth and fifth, supplying 5.4 percent and 2.1 percent, respectively.

Chart 5: Electricity Sales Composite Index, Percentage Change

- The **Electricity Sales Composite Index** declined by 2.8 percent in June 2025 on a monthly basis, in contrast to the 12.6 percent increase recorded in the preceding month. On a year-on-year basis, the index increased by 12.1 percent (see Chart 5).
- Total electricity sales for June 2025 amounted to 368 848 MWh, lower than the 379 603 MWh sold in May 2025 but significantly above the 328 891 MWh sold in June 2024.

Chart 6: Electricity Domestic Sales Index, Percentage Change²

- The **Domestic Electricity Sales Index** rose by 1.9 percent in June 2025 on a monthly basis, marking a slowdown from the 4.8 percent growth recorded in May 2025. Year-on-year, the index increased by 1.1 percent (see Chart 6).
- Most of the domestic electricity sales were to Redistributors – LPU, accounting for 66.7 percent, followed by the Mining sector at 26.0 percent and Eskom Orange River at 3.2 percent.
- Domestic electricity sales to Farms – Main Supply and Commercial – LPU ranked fourth and fifth, contributing 1.1 and 0.9 percent, respectively.

² This chart is limited to -6 percent for better readability.

Chart 7: Electricity Export Sales Index, Percentage Change³

- The **Electricity Export Sales Index** fell by 27.3 percent in June 2025, reversing the 82.7 percent increase recorded in May 2025. However, on a year-on-year basis, the index surged by 422.8 percent (see Chart 7).
- During the review period, Namibia exported a total of 44 983 MWh of electricity. The largest proportion of 95.0 percent was sold to STEM Sales – SAPP. Botswana was the second-largest destination, receiving 2.8 percent, while South Africa and Angola followed with 1.2 percent and 1.0 percent, respectively.

³ This chart is limited to 100 percent for better readability.

Methodology : Graphical and tabular analysis

Data Sources : The data source for the volume of electricity is sourced from Nam-power. These are data on domestic and export sale, Own Generation and import sources. The Production is in kilowatts per hour (kWh) for all the variables.

Index calculation: The index of sales and sources weighted uses the volume data of 2015.

Conversion : 1 basis point = 0.01 percent
