FOREWORD

The Government of the Republic of Namibia, through the Namibia Statistics Agency, conducted the fourth Namibia Population and Housing Census in September 2023 with the 24th of September 2023 being the census reference night (CRN). The Population and Housing Census (PHC) is the most comprehensive and reliable national data resource that provides critical input into national development planning and programs. The census further provides data to measure the impact of various development programs embarked upon by Government, NGOs, and other stakeholders in Namibia. The data produced from the 2023 census gave impetus to developing baselines for the national development plans such as the Sixth National Development Plan (6th NDP), and the Vision 2030.

This report highlights key findings from an initial analysis of the 2023 census data, concentrating on the Erongo region at urban, rural, and constituency levels. The results are essential for guiding the Government, development partners, civil society organizations, and the public on aspects such as the region's population size, population distribution, and population composition among other factors. Also please take note that similar reports for the other thirteen regions were also produced and published.

Please note that some statistical indicators presented in this Regional Profile may differ slightly from those published in the 2023 Census Main Report. These insignificant differences are primarily due to revisions made after the release of the 2023 Census Main report and during further data validation and analysis at the regional level. Users are advised to interpret the figures in these regional reports with this context in mind.

I would like to express our sincere gratitude to all the partners who supported and contributed to the success of the 2023 Namibia Population and Housing Census. This includes the Government of the Republic of Namibia, various Ministries and Government institutions, Mobile Telecommunications Limited (MTC Namibia), Namibian Broadcasting Corporation (NBC), the United Nations Population Fund (UNFPA), United Nations Economic Commission for Africa (UNECA), Statistics South Africa (Stats SA) and the United Kingdom's Office of National Statistics (ONS) for their invaluable support in numerous ways.

I would also like to thank all the field staff including census regional coordinators, IT personnel, assistants, supervisors, and enumerators as well as the NSA staff for their hard work and sacrifice. Lastly, let me express my gratitude to the Namibian people for allowing census staff to visit their households and get information from the members of the households. The census would not have succeeded without the cooperation of the Namibian people.

I finally recommend the invaluable information contained in this regional report of the Namibia Population and Housing Census be used as updated evidence for all decisions and Policymaking for the regional development programs.

CHAPTER 1 : INTRODUCTION

The Namibia Statistics Agency (NSA) is mandated by Part III, Section 7, sub-section 2 (d) of the Statistics Act No.9 of 2011, to conduct Population and Housing Censuses every ten (10) years. This places a legal obligation on all NSA employees and stakeholders involved in the implementation of the Namibia 2023 Population and Housing Census (henceforth referred to as the 2023 Census) to record, process, analyze and disseminate responses received during the 2023 census enumeration truthfully and accurately. The Statistics Act, through Part VIII, Sections 44 and 45 underscores the importance of data security in that all personnel involved in the 2023 Census sign the Oath of Secrecy that ensures data collected in the 2023 Census that could be linked to individuals and households are kept strictly confidential.

The 2023 Census was the fourth undertaking since Namibia's independence in 1990, and the first spatially enabled digital census in the country. The first complete census was conducted in 1991, followed by the second and third censuses, conducted in 2001 and 2011 respectively.

The main objective of the 2023 Census is to provide up-to-date demographic and socio-economic statistical information about the population and their living conditions, necessary for evidence-based planning, decision-making, and policy formulation. The 2023 Census further, provides data for monitoring and evaluation of development programs at national, regional, and constituency levels while also providing the indicators to evaluate progress against national and international Agenda such as Vision 2030, National Development Plans (NDPs), Harambee Prosperity Plan, Sectoral Plans, Africa Agenda 2063 and the Agenda 2030 Sustainable Development Goals (SDGs).

The 2023 Census enumeration was carried out over three weeks from 18 September to 06 October 2023. The first week (18 – 23 September 2023) was dedicated to the household listing exercise and thereafter the enumeration of all persons and housing units took place from 24 September to 06 October 2023). The 2023 Census Reference Night (CRN) was the night of the 24 September 2023.

The 2023 Census targeted the population in conventional/private households including those in institutions for example, in school hostels, army/police barracks, hospitals wards, correctional facilities and special population groups such as the homeless, travelers, sea workers etc. Therefore, the actual population presented in this report reflects the Namibia population on the CRN census in 2023.

This report presents highlights from basic analysis of the 2023 census data and presents results at regional, urban, rural and constituency levels.

1.1. Methodology

The 2023 Census adopted a de facto method of enumeration, which is the enumeration of all persons in the country at a particular point in time. The census project was implemented in three broad phases as per the international standards and best practices. as follows:

1.1.1. Pre-Enumeration phase

This phase covered census planning, census mapping, census tools development such as questionnaire development, edit rules, scripting of the questionnaire, Computer-Assisted -Personal-Interviews (CAPI) application development and testing, and the like. phase kicked off with the census mapping exercise in October 2019 and concluded with the census pilot in November 2021.

The census mapping, in particular, entails visiting and enumerating all structures in the country including the collection of basic information on their use. The purpose of this exercise was to demarcate the entire country into uniquely defined units known as Enumeration Areas (EAs) in preparation for the census enumeration. A total of 8,738 EAs were demarcated nationally and formed the basis for all census logistics.

Similarly, the census pilot was undertaken to assess the readiness of all census tools, processes and logistical arrangements. The pilot was implemented in 109 purposively selected EAs (54 EAs from urban areas and 55 EAs from rural areas) across the country.

1.1.2. Enumeration phase

The enumeration phase comprised of the finalization of census tools, census publicity and advocacy, recruitment and training of field staff, transport and logistics, listing, main enumeration, and data transmission. The main enumeration commenced country-wide from 25 September 2023 to 06 October 2023, however, with extensions for final verifications, the fieldwork only concluded officially on 05 November 2023.

The deployment comprised of assigning an Enumerator to an EA in urban areas, while in rural areas, two Enumerators were allocated to an EA in a sweeping mode. These field staff were supported by a team supervisor, constituency supervisor, constituency IT field technician, constituency fleet officer, constituency publicity officer, deputy regional census coordinator, and regional census coordinator. All these levels ensured daily data transmission from the field to the head office server to avoid loss of data.

Finally, to safeguard the quality of the 2023 Census data, a total quality assurance approach based on the Namibia Quality Assurance Framework for Statistics (NQAFS) was adopted. This approach ensured the quality of digital tile packages, printed maps, questionnaires, applications, field manuals, and training of all census staff. The census data quality assurance manual was developed to inform fieldwork procedures, plans, and guidelines. In addition, the census dashboard that extracts data from the central server was developed and used by the data monitoring team to check for data inconsistencies and flag out areas of concern during enumeration.

The summary checks on the data received from the central server were shared with the regional field staff and verification was carried out during data collection to ensure data quality. Furthermore, the NSA conducted a Post Enumeration Survey (PES) to measure the coverage and content error of Census data.

During enumeration, the census situation room was set up at the head office to provide overall management oversight of the enumeration progress using the census dashboard and daily regional reports. This platform provided an opportunity to timely resolve issues and challenges experienced in the field on a daily basis.

1.1.3. Post-Enumeration Phase

The post-enumeration activities include the data processing, release of preliminary results, and thematic analysis and dissemination of census results. The use of technology at all stages of the census enabled timely processing of census data and the production of reports. The quality of the census data can be affirmed by the results of Post Enumeration Surveys.

CHAPTER 2 : POPULATION SIZE, GROWTH AND COMPOSITION

This chapter presents highlights of the population characteristics related to size, growth and composition for Erongo region based on the 2011 and 2023 census results.

2.1. Population size and Growth

The population of Erongo region was 240,206 in 2023. More people reside in urban (216,215) than rural (23,991) areas.

Figure 2.1: Population size by urban and rural residence: Erongo region, Namibia, 2023 Census

The largest population in Erongo was found in Swakopmund constituency (75,921) while the constituency with the least population was Omaruru (13,322).

Figure 2.2: Population size by constituency: Erongo region, Namibia, 2023 Census

The population of Erongo region increased by 59.3 percent between 2011 and 2023. The urban population has increased significantly by 64.1 percent, and the rural population increased by 26.0 percent. While the population increased in all the constituencies, the percentage changes varied, ranging from 28.6 percent in Daures to 91.3 percent in Walvis Bay Rural.

Figure 2.3: Percentage change in population size by area, 2011 – 2023: Erongo region, Namibia, 2023 Census

2.2. Sex composition

There were slightly more males (50.9%) than females (49.1%) in Erongo region. There were significantly more males relative to females in rural (56.9%) and urban (50.3%) areas. This overall pattern is replicated in all the constituencies except Swakopmund where males and females were equivalent.

Figure 2.4: Percent population share [Composition] by area and sex: Erongo region, Namibia, 2023
Census

2.3. Age structure

Erongo region is dominated by the young and youthful population. Persons aged 0-14 and 15-34 years constituted about two-thirds (65.9%) of the population. This regional pattern is replicated in all areas, although to a lesser extent in rural areas (63.8%) and Walvis Bay Urban constituency (63.5%).

Additionally, the elderly population share exceeded the 10 percent mark in Arandis, and Daures.

Figure 2.5: Percent Population distribution by area and broad age groups: Erongo region, Namibia, 2023
Census

The median age of the population in Erongo region was 27.4 years. The population was younger in rural (26.8 years) compared to urban (27.5 years) areas. However, significant variation was observed across the constituencies, the least being Omaruru (25.2 years) and the highest being Walvis Bay Urban (28.8 years).

Figure 2.6: Median age of the population by area: Erongo region, Namibia, 2023 Census

2.4. Population density

The population density of Erongo region was 3.8 persons/km². Walvis Bay Urban was the most densely populated constituency (2,730.8 persons/km²) and Daures the least densely populated (0.8 persons/km²). The Daures constituency which is predominantly rural had population density of less than 1 persons/km², while those constituencies which are predominantly urban (Walvis Bay Urban and Swakopmund) had a higher population density.

Table 2.2: Population density by area: Erongo region, Namibia, 2023 Census

Area	Population	Area in km ²	Persons per (km ²)
Erongo	240 206	63 639.27	3.8
Arandis	13 542	13 519.74	1.0
Daures	14 601	17 786.64	0.8

Walvis Bay Rural	51 497	9 149.99	5.6
Walvis Bay Urban	51 618	18.90	2 730.8

Erongo region is a predominantly sparsely populated, with the highest concentration of residential dwellings found in Omaruru, Usakos, Henties bay, Karibib, Swakopmund and Walvis Bay. These towns serve as the primary population hubs, while the rest of the region remain largely rural with scattered settlements.

CHAPTER 3 : POPULATION CHARACTERISTICS

This chapter provides information on marital status, citizenship, birth and death registration, national ID, general health and functioning, albinism, and orphanhood.

3.1. Marital Status and Age at first marriage

In Erongo region, 71.4 percent of the male population aged 15 years and above were never married, compared to 69.1 percent of females.

Figure 3.1: Percent population aged 15 years and above by marital status and sex: Erongo region, Namibia, 2023 Census

The median age at first marriage/consensual union in Erongo region was 30.4 years, with males having a higher median age (32.7 years) than females (28.2 years) and the same trend was observed across all areas.

Table 3.1: Median age at first marriage/consensual union by sex and area: Erongo region, Namibia, 2023 Census

3.2. Birth registration, National ID and Death Registration

This section provides information on Namibian birth registration status, national ID and death registration.

3.2.1 Birth registration

This subsection provides information on Namibian birth registration status, which is needed to access social services, such as social grants and educational services.

About 93 percent of the population in Erongo region were issued with a birth certificate by the Namibian Government. The percentage of the population issued with a birth certificate by the Namibian Government in urban (94.0%) was much higher than rural (86.2%) areas. At constituency level, Walvis Bay Rural (95.9%) had the highest percentage while Daures (86.9%) had the least.

Figure 3.2: Percent distribution of population with birth certificate issued by Namibian Government by area: Erongo region, Namibia, 2023 Census

There were 10.4 percent of children aged 0–4 years without birth certificate in Erongo region. The percentage of children without birth certificates in rural areas (22.9%) was significantly higher compare to urban (8.8%) areas. At constituency level, Daures (21.1%) had the highest percentage while Walvis Bay Urban (4.7%) the least.

Figure 3.3: Percent distribution of population aged 0 – 4 years without birth certificate by area: Erongo region, Namibia, 2023 Census

3.2.2. National Identification document (ID)

This section provides information that determines the coverage of Identification Documents (ID cards) in circulation. There are two types of ID: New blue/pink (issued after independence) and SWA ID (issued before independence).

There were 92.6 percent of the population aged 16 years and above in Erongo region issued with a new Namibian ID. Urban areas (93.7%) had a higher percentage of new ID holders compared to rural areas (82.4%). At the constituency level, Arandis (95.5%) had the highest percentage while Walvis Bay Urban (83.8%) the least.

Figure 3.4: Percent distribution of population aged 16 years and above with new Namibian ID by area: Erongo region, Namibia, 2023 Census

Note: New ID referred to here is the blue ID for Namibian and pink for permanent residents, SWA ID is not included.

3.2.3. Death registration

Over 90 percent of deaths in the Erongo region were registered. This overall pattern is replicated in all the areas, except in Daures constituency with less than 90 percent reported deaths registered.

Figure 3.5: Registered deaths by area: Erongo region, Namibia, 2023 Census

3.3. Citizenship

96.5 Percent of the population in Erongo region were Namibian citizens. A similar pattern is observed for the rest of the areas.

Figure 3.6: Population by citizenship and Census year: Erongo region, Namibia, 2023 Census

Note: No country of citizenship means that a person does not officially belong to any country. They don't have the legal status of being a citizen of any country. This situation can happen if someone is stateless, meaning they aren't recognized as a citizen by any country.

Among Namibia's neighboring countries, Angolan nationals accounted for the largest share of non-Namibian citizens enumerated (34.2%), whereas individuals from Botswana constituted one of the lowest percentage (0.6%).

3.5. Difficulty in performing activities

This section aims to provide information on the general health and functioning of the population aged five years and older based on six Washington Group (WG) short set of functional questions/ domains: namely seeing, hearing, communicating, walking or climbing stairs, remembering or concentrating, and self-care.

Over 90 percent of the population had no difficulty in performing an activity in five of the six measured domains in Erongo region, except for “Seeing”, which had a lower percentage of 88.4.

Table 3.4: Percent distribution of population aged 5 years and above by domain and degree of difficulty in performing an activity: Erongo region, Namibia, 2023 Census

3.7. Orphanhood

Information on orphanhood was collected to provide information on the number of orphans. The term orphanhood refers to persons aged 17 years and below who have lost either one or both parents.

In Erongo region, 5.5 percent of children had lost one parent, while 0.7 percent lost both parents. Orphanhood was more prevalent in rural areas (0.9% with both parents not alive) than in urban areas (0.7% with both parents not alive). At constituency level, Arandis (1.4%) had the highest proportion of orphans without both parents while Walvis Bay Urban (0.5%) had the least.

CHAPTER 4 : SOCIO-ECONOMIC CHARACTERISTICS OF THE POPULATION

The chapter focuses on the socioeconomic characteristics of the population, providing essential information for decision-making, planning, and monitoring of development programs and policies.

4.1. Information and Communication Technology (ICT)

This section provides valuable information on ICT which is required by institutions that deal with ICT infrastructure and regulations.

Most persons 3 years and above in Erongo region access information through SMS (64.7%) and Television (61.5%). The same pattern was observed in urban areas, 66.6 and 65.1 percent respectively. However, in rural areas, the majority accessed information through SMS (48.2%) and radio (44.7%).

4.2. Social grants/ pension

Old age pension (10,976) for population aged 60 years and above, was the most received social grant in Erongo region while war veterans/ex-combatants was received by only 753 persons.

Figure 4.1: Distribution of population receiving social grant/pension: Erongo region, Namibia, 2023 Census

4.3. Sports activities

A significant percentage of the population aged 4 years and above at the time of the 2023 census (69.5%) never participated in sports activities for 30 minutes or more in Erongo region. The same pattern was replicated across all areas, however, is worth noting that at constituency level Omaruru and Walvis Bay Rural (13.7%) constituency had the highest proportion of persons who participated more than three times a week.

Table 4.2: Percent distribution of population aged 4 years and above participating in sport activities for 30 minutes or more by frequency and area: Erongo region, Namibia, 2023 Census

4.4. Early Childhood Development (ECD), Literacy and Education

4.4.1. ECD

This section presents information on ECD attendance and the main reason for not attending, for children aged 0 – 5 years.

Overall, 32.2 percent of the population aged 0-5 years were enrolled in ECD programmes. Urban areas (34.7%) had a significantly higher percentage of children enrolled in ECD programmes compared to rural areas (12.5%).

Figure 4.4: Percent of population aged 0 – 5 years attending ECD by area: Erongo Region, Namibia, Census 2023

In Erongo region, the primary reason for not attending ECD programmes was 'Too young to attend' (75.7%), while the least was illness and disability (0.2%). This pattern was observed across all areas in the region. However, it is worth noting that in Daures constituency 15.1 percent of children aged 0 – 5 years are not attending ECD programmes due to distance to centre.

Table 4.3: Main reason for not attending ECD for population aged 0 – 5 years by area: Erongo Region, Namibia, Census 2023

4.4.2. Literacy

Over 95 percent of persons aged 15 years or more in Erongo region can read and write. Literacy rate was higher in urban (96.8%) than in rural (83.8%) areas. At constituency level, Walvis Bay Rural (97.9%) had the highest literacy rate while Daures (82.5%) had the lowest.

Figure 4.5: Literacy rate for population aged 15 years and above by area: Erongo Region, Namibia, Census 2023

4.4.3. Education

This section presents information on education for persons aged 6 years and above.

4.4.3.1. School Attendance

The largest percentage (63.4%) of the population aged 6 years and above have left school, while 24.1 percent were attending primary or secondary school. In addition, rural areas (13.8%) had a higher proportion of population that never attended school compared to urban (3.0%).

Figure 4.6: Percent distribution of the population aged 6 years and above by area and school attendance: Erongo Region, Namibia, Census 2023

4.4.3.2. School Enrolment

The school enrolment rate in Erongo region was 74.2 percent. The enrolment rate was higher in urban (75.2%) than rural (64.7%) areas. Moreover, at constituency level, Arandis (77.3%) had the highest enrolment rate while Daures (65.7%) had the lowest enrolment rate.

Figure 4.7: Enrolment rate for school going population (6 – 24 years of age) by area: Erongo Region, Namibia, Census 2023

Overall, school enrolment rates in Erongo were high for the ages of 8 to 15 years and declined thereafter. Females had a higher enrolment rate across all ages compared to males.

Figure 4.8: Enrolment rate for school going population (6 – 24 years) by sex and age: Erongo Region, Namibia, Census 2023

4.4.3.3. Educational Attainment

Over 40 percent of the population aged 15 years and above in Erongo region had completed primary education, while those who only completed informal education were 1.0 percent.

4.5. Labour Force Characteristics

The 2023 PHC adopted the ICLS 19 resolution 1 standard questions as set up by the ILO to measure the economic activity status. The 19th ICLS was to update the previous standards on statistics of the economically active population, employment, and unemployment (13th ICLS, 1982) by setting up a new framework for work and labor market statistics. This section provides an overview of economic activity. Detailed statistics are presented in the Namibia 2023 Labour Force thematic report.

In Erongo region, 68.0 percent of the population aged 15 years and above in labour force were employed. It is important to highlight that a significant proportion (95.0%) of the potential labour force were discouraged jobseekers.

Figure 4.10: Population aged 15 years and above by activity status: Erongo Region, Namibia, Census 2023

4.6. Urbanization

The level of urbanization indicates the relative number of inhabitants in urban areas compared to rural areas.

The level of urbanization in Erongo had increased by 2.6 percentage points from 87.4 percent in 2011 to 90.0 percent in 2023 in Erongo region.

Figure 4.11: Urbanization level by Census year (2011 and 2023): Erongo Region, Namibia, Census 2023

Out of all the 7 urban localities in Erongo region, Walvis Bay was the most populous town across all two census years with 62,096 and 102,707 persons, in 2011 and 2023 respectively. Omaruru (70.0%) had the highest population increase, while Arandis (10.8%) had the lowest population increase.

CHAPTER 5 : POPULATION DYNAMICS

This chapter analyses components of population change: fertility and mortality, presented at regional, urban/rural and constituency levels.

5.1. Fertility

This section presents the basic direct fertility indicators such as Crude Birth Rate (CBR), age at first live birth and birth delivery assistance for women aged 15 – 49 years.

5.1.1. Crude Birth Rate (CBR)

Women in Erongo region gave birth to 6,014 babies in the year preceding the census, and this is equivalent to the CBR of 25.0 births per 1,000 population. The CBR was higher in rural compared to urban areas, with 27.0 and 24.8 births per 1,000 population respectively. However, significant variation was observed across the constituencies, the highest being Karibib (33.8 births per 1,000 population) and the least being Daures (22.1 births per 1,000 population).

Table 5.1: CBR by area: Erongo region, Namibia, 2023 Census

Area	Population	Births	CBR
Erongo	240 206	6 014	25.0
Urban	216 215	5 366	24.8
Rural	23 991	648	27.0
Arandis	13 542	316	23.3
Daures	14 601	322	22.1

Walvis Bay Rural	51 497	1 407	27.3
Walvis Bay Urban	51 618	1 206	23.4

5.1.2. Age at First Live Birth

The median age of mother at first live birth in Erongo region was 21.6 years. Mothers in rural (20.3 years) gave birth at a younger age compared to mothers in urban (21.7 years) areas. Furthermore, the median age at first live birth in Daures, Omaruru, Karibib and Arandis were below the regional median age.

Figure 5.1: Median age of mother at first live birth by area: Erongo region, Namibia, 2023 Census

5.1.3. Birth Delivery Assistance

Over 90 percent of the births in Erongo region were attended by medical professionals (medical doctors and nurse/midwives) and this overall pattern is replicated in all areas. However, it is worth noting that the constituency which is predominantly rural (Daures and Karibib) had more than 4 percent of births attended by non-medical professionals.

Figure 5.2: Percent distribution of births by area and type of delivery: Erongo region, Namibia, 2023 Census

5.2. Mortality

This section provides information on deaths that occurred in the household in the last 12 months (October 2022 to September 2023) as well as the direct estimates of Crude Death Rates (CDR) which portray the overall mortality pattern in the country.

5.2.1. Crude Death Rate (CDR)

There were 1,041 deaths reported in the year preceding the census which gives a CDR of 4.3 deaths per 1,000 population in Erongo region. The CDR was higher in rural (11.7 deaths per 1,000 population) than urban areas (3.5 deaths per 1,000 population). At constituency level, the highest CDR was recorded in Daures (11.0 deaths per 1,000 population) while the lowest was in Walvis Bay Rural (2.6 deaths per 1,000 population).

Table 5.2: CDR by area: Erongo region, Namibia, 2023 Census

5.2.3. Causes of deaths

The highest cause of deaths in Erongo region was other illness (28.4%) while vomiting/diarrhea (1.5%) was the least cause of deaths.

Figure 5.3: Percent distribution of causes of deaths: Erongo region, Namibia, 2023 Census

Note: “Other illness” refers to any health condition or disease not specifically listed in the questionnaire. This category captures responses where individuals reported illnesses that fall outside the predefined options provided during data collection.

CHAPTER 6 : HOUSEHOLDS AND HOUSING CHARACTERISTICS

This chapter provides information on household characteristics, particularly on household size, head of household, main source of income/livelihood, main language spoken at home, and assets. Furthermore, it analyses the characteristics of housing (type of housing, tenure, building materials), covering all structures used as dwelling units and amenities.

6.1. Number of households

Note: Safe water was considered as water from the following sources: piped water inside, outside, public pipe, well-protected, bottled water, and boreholes with tank covered. Other includes canal, well unprotected and other main source of water for drinking.

Flush toilet was the predominant type of main toilet facility in Erongo region and in urban areas. However, in rural areas, 44.1 percent of the households has no toilet facility. At constituency levels, most of the constituencies had flush toilet except Daures, Karibib, and Omaruru which had a slightly higher percentage in households with no toilet facility.

ANNEX I : DEFINITION OF CONCEPTS

Dwelling unit

- Dwelling unit is a building/ structure where households live. It's a place of residence occupied by one or more households.
- Sometimes a household can occupy more than one building/ structure. On the other hand, households can occupy only part of the buildings/ structure; in that case, that building/ structure becomes the Dwelling unit for all households within it. Buildings/ structures can be classified into dwelling units, living quarters other than dwelling units (institutions) and non-dwelling units.

Institutions

An institution can be defined as sets of premises in a permanent structure or structures designed to accommodate groups of persons who are bound by either a common public objective or a common personal interest. Institutions can be categorized into two groups, i.e. residential and non-residential institutions.

- Residential institutions include institutions where people may be allowed to reside for certain period of time for learning or employment purposes.
- Non-residential institutions include institutions such as hotel/ lodges, police holding cells hospitals, etc. These groups of people cannot be said to belong to a conventional household since they do not meet the same criteria as that of a household.

Households (Conventional/ Private)

A household usually consists: (1) of one or more persons, related or unrelated, (2) who live together in the same house/ homestead/ compound, but not necessarily in the same dwelling unit, (3) who have the same or common catering or eating arrangements (cook and eat together), and (4) who are answerable to the same head of household.

Homestead

It is an isolated compound with one or more structures and usually inhabited by one or more households. In most cases homesteads will be surrounded by fences, hedges, wall etc. A homestead may contain a traditional dwelling or a group of traditional dwellings. A traditional dwelling will thus be considered a homestead. However, a wall/fence or hedge need not necessarily surround a homestead. For instance, boys' quarters, garage, kitchen etc. may be part of a homestead whether or not they are surrounded by a fence/ wall, etc. During interviews, you will visit homesteads and identify the structures, dwelling units and households in homesteads.

Household members

Refers to all persons who were actually present in the household on the census reference night, including visitors except those attending social events (Birthday parties, weddings, funerals etc.), employees on night shift and resident domestic servants and their families.

Head of household

The head of household is the person of either sex who is looked upon by other members of the household as their leader or main decision-maker. If she/he was absent on the CRN, the next responsible adult member (acting head of household) should be considered as the head.

Note: a head of household should be 12 years and above.

Usual Member

Usual member refers to persons who have been living in the household for 6 months or more, or intend to stay in the household for the next 6 months.

Census Reference Night (CRN)

All interviews must relate to CRN, except for selected parts of the questionnaire, in this case an alternative reference is stated (e.g. some questions in Section E have a reference of last 7 days). The CRN was the night of 24 September 2023.

De Facto

A de-facto method enumerates all persons found within the borders of a particular country at a particular point in time (i.e. CRN).

De Jure

A de jure method interviews all persons who are usually living within the border of a particular country or household, even if they were not present during the time of the census.

Sex ratio

Sex ratio is the proportion of males per 100 females in a given population.

Marital status

Refers to the legal and social status of an individual in relation to marriage. It indicates whether a person is married, never married, divorced, widowed, or in a consensual union (living together as if married/cohabitating).

Median age at first marriage/consensual union

Refers to the age at which half of the persons or a group of persons in a population get married/consensual union for the first time, providing a central point that is less influenced by extreme values.

Albinism

Is a rare, non-contagious, genetically inherited condition characterized by reduced or no melanin production, resulting in light skin, hair, and eyes, vision impairment, and sensitivity to sunlight (WHO).

Orphanhood Refers to persons aged 17 years and below who have lost either one or both parents.

Literacy

Is the ability to read and write with understanding in any language. All persons aged 15 years and above were asked whether they can read and write in any language with understanding, but no test was administered to determine the level of literacy.

Formal education

Refers to any regular formal educational institution, public or private for systematic of any level of education.

School attendance

Is defined as a full-time attendance at any regular educational institution, public or private, for systematic instruction for longer than a year.

School enrolment

Refers to the school-going population aged 6 to 24 years who were attending school, excluding those attending adult education.

Educational attainment

Refers to the highest level of education completed (refers to a complete cycle whether it was pass or fail).

Household size

Is the average number of persons in the household.

Head of household

Is a person, of either sex who is looked upon by other members of the household as their leader or main decision-maker.

Tenure

Refers to the conditions that govern individuals' rights to occupy dwelling units.
