FOREWORD

The Government of the Republic of Namibia, through the Namibia Statistics Agency, conducted the fourth Namibia Population and Housing Census in September 2023 with the 24th of September 2023 being the census reference night (CRN). The Population and Housing Census (PHC) is the most comprehensive and reliable national data resource that provides critical input into national development planning and programs. The census further provides data to measure the impact of various development programs embarked on by Governments, NGOs, and other stakeholders in Namibia. The data requirements to monitor national development programs such as the Fifth National Development Plan (5th NDP), and the Vision 2030 can primarily be provided by a census.

This report highlights key findings from an initial analysis of the 2023 census data, concentrating on the **Kavango East region** at urban, rural, and constituency levels. The results are essential for guiding the Government, development partners, civil society organizations, and the public on aspects such as the region's population size, distribution, and demographic composition among other factors.

Please note that some statistical indicators presented in this Regional Profile may differ slightly from those published in the 2023 Census Main Report. These differences are primarily due to revisions made after the release of the 2023 Census Main report and during further data validation and analysis at the regional level. Users are advised to interpret the figures in these regional reports with this context in mind.

I would like to express our sincere gratitude to all the partners who supported and contributed to the success of the 2023 Namibia Population and Housing Census. This includes the Government of the Republic of Namibia, various Ministries and Government institutions, Mobile Telecommunications Limited (MTC Namibia), Namibian Broadcasting Corporation (NBC), the United Nations Population Fund (UNFPA), United Nations Economic Commission for Africa (UNECA), Statistics South Africa (Stats SA) and the United Kingdom's Office of National Statistics (ONS) for their invaluable support in numerous ways.

I would also like to thank all the field staff including census regional coordinators, IT personnel, assistants, supervisors, and enumerators as well as the NSA staff for their hard work and sacrifice. Lastly, let me express my gratitude to the Namibian people for allowing census staff to visit their households and get information from the members of the households. The census would not have succeeded without the cooperation of the Namibian people.

I finally recommend the invaluable information contained in this regional report of the Namibia Population and Housing Census be used as updated evidence for all decisions and Policymaking for the regional development programs.

CHAPTER 1 : INTRODUCTION

The Namibia Statistics Agency (NSA) is mandated by Part III, Section 7, sub-section 2 (d) of the Statistics Act No.9 of 2011, to conduct Population and Housing Censuses every ten (10) years. This places a legal obligation on all NSA employees and stakeholders involved in the implementation of the Namibia 2023 Population and Housing Census (henceforth referred to as the 2023 Census) to record, process, analyze and disseminate responses received during the 2023 census enumeration truthfully and accurately. The Statistics Act, through Part VIII, Sections 44 and 45 underscores the importance of data security in that all personnel involved in the 2023 Census sign the Oath of Secrecy that ensures data collected in the 2023 Census that could be linked to individuals and households are kept strictly confidential.

The 2023 Census was the fourth undertaking since Namibia's independence in 1990, and the first spatially enabled digital census in the country. The first complete census was conducted in 1991, followed by the second and third censuses, conducted in 2001 and 2011 respectively.

The main objective of the 2023 Census is to provide up-to-date demographic and socio-economic statistical information about the population and their living conditions, necessary for evidence-based planning, decision-making, and policy formulation. The 2023 Census further provides data for monitoring and evaluation of development programs at national, regional, and constituency levels while also providing the indicators to evaluate progress against national and international Agenda such as Vision 2030, National Development Plans (NDPs), Harambee Prosperity Plan, Sectoral Plans, Africa Agenda 2063 and the Agenda 2030 Sustainable Development Goals (SDGs).

The 2023 Census enumeration was carried out over three weeks from 18 September to 06 October 2023. The first week (18 – 23 September 2023) was dedicated to the household listing exercise and thereafter the enumeration of all persons and housing units took place from 24 September to 06 October 2023). The 2023 Census Reference Night (CRN) was the night of the 24 September 2023.

The 2023 Census targeted the population in conventional/private households including those in institutions for example, in school hostels, army/police barracks, hospitals wards, correctional facilities and special population groups such as the homeless, travelers, sea workers etc. Therefore, the actual population presented in this report reflects the Namibia population on the CRN census in 2023.

This report presents highlights from basic analysis of the 2023 census data and presents results at regional, urban, rural and constituency levels.

1.1. Methodology

The 2023 Census adopted a de facto method of enumeration, which is the enumeration of all persons in the country at a particular point in time. The Census project was implemented in three broad phases as per the international standards and best practices. as follows:

1.1.1. Pre-Enumeration phase

This phase covered census planning, census mapping, census tools development such as questionnaire development, edit rules, scripting of the questionnaire, Computer-Assisted-Personal-Interviews (CAPI) application development and testing, and the like. phase kicked off with the census mapping exercise in October 2019 and concluded with the Census pilot in November 2021.

The census mapping, in particular, entails visiting and enumerating all structures in the country including the collection of basic information on their use. The purpose of this exercise was to demarcate the entire country into uniquely defined units known as Enumeration Areas (EAs) in preparation for the census enumeration. A total of 8,738 EAs were demarcated nationally and formed the basis for all census logistics.

Similarly, the census pilot was undertaken to assess the readiness of all census tools, processes and logistical arrangements. The pilot was implemented in 109 purposively selected EAs (54 EAs from urban areas and 55 EAs from rural areas) across the country.

1.1.2. Enumeration phase

The enumeration phase comprised of the finalization of census tools, census publicity and advocacy, recruitment and training of field staff, transport and logistics, listing, main enumeration, and data transmission.

The main enumeration commenced country-wide from 25 September 2023 to 06 October 2023, however, with extensions for final verifications, the fieldwork only concluded officially on 05 November 2023. Three different questionnaires were administered: Form A for Private/conventional households and Form B for Institutional (School hostels, Army barracks, prisons, University hostel, etc.) households and Form C for Special populations (Hospitals - inpatient, hotels, travelers, homeless, etc.). Form A had individual/person records, household records, and mortality records. While Form B only had individual/personal records. In contrast, Form C had only 8 individual/person records.

The deployment comprised of assigning an enumerator to an EA in urban areas, while in rural areas, two enumerators were allocated to an EA in a sweeping mode. These field staff were supported by a team supervisor, constituency supervisor, constituency IT field technician, constituency fleet officer, constituency publicity officer, deputy regional census coordinator, and regional census coordinator. All these levels ensured daily data transmission from the field to the head office server to avoid loss of data.

Finally, to safeguard the quality of the 2023 Census data, a total quality assurance approach based on the Namibia Quality Assurance Framework for Statistics (NQAFS) was adopted. This approach ensured the quality of digital tile packages, printed maps, questionnaires, applications, field manuals, and training of all census staff. The census data quality assurance manual was developed to inform fieldwork procedures, plans, and guidelines. In addition, the census dashboard that extracts data from the central server was developed and used by the data monitoring team to check for data inconsistencies and flag out areas of concern during enumeration.

The summary checks on the data received from the central server were shared with the regional field staff and verification was carried out during data collection to ensure data quality. Furthermore, the NSA conducted a Post Enumeration Survey (PES) to measure the coverage and content error of census data.

During enumeration, the census situation room was set up at the head office to provide overall management oversight of the enumeration progress using the census dashboard and daily regional reports. This platform provided an opportunity to timely resolve issues and challenges experienced in the field on a daily basis.

1.1.3. Post-Enumeration Phase

The post-enumeration activities include the data processing, release of preliminary results, and thematic analysis and dissemination of census results. The use of technology at all stages of the census enabled timely processing of census data and the production of reports. The quality of the census data can be affirmed by the results of Post Enumeration Surveys.

CHAPTER 2 : POPULATION SIZE, GROWTH AND COMPOSITION

This chapter presents highlights of the population characteristics related to size, growth and composition for Kavango East region based on the 2011 and 2023 census results.

2.1. Population size and Growth

The population of Kavango East region was 218,421 in 2023. More people reside in urban (124,419) than rural (94,002) areas.

Figure 2.1: Population size by urban and rural residence: Kavango East region, Namibia, 2023 Census

The largest population in Kavango East was recorded in Rundu Urban constituency (118,632) while the lowest was in Rundu Rural (12,405) constituency.

Figure 2.2: Population size by constituency: Kavango East region, Namibia, 2023 Census

The population of Kavango East region increased by 59.6 percent between 2011 and 2023. The urban population has increased significantly, by 96.1 percent, while the rural population increased by 28.1 percent. While the population increased in all the constituencies, the percentage changes varied, ranging from 24.2 percent in Mashare to 87.0 percent in Rundu Urban.

Figure 2.3: Percentage change in population size by area, 2011 – 2023: Kavango East region, Namibia, 2023 Census

2.2. Sex composition

There were more females (53.2%) than males (46.8%) in Kavango East region. There were more females relative to males in urban (53.8%) than rural (52.4%) areas. This overall pattern is replicated in all the constituencies where there are slightly more females than males.

Figure 2.4: Percent population share [Composition] by area and sex: Kavango East region, Namibia, 2023 Census

2.3. Age structure

Kavango East region is dominated by the young and youthful population. More than three-quarter of the population were persons aged 0-14 and 15-34 years (Accounting for 76.4% of the population). This pattern is replicated in all areas where the percentage was over 70 percent for the young and youthful.

Figure 2.5: Percent Population distribution by area and broad age groups: Kavango East region, Namibia, 2023 Census

The median age of the population in Kavango East region was 17.9 years. The population was younger in rural (16.9 years) compared to urban (18.7 years) areas. In addition, a relatively younger population was observed in all constituencies, however, the median age was highest in Rundu Urban (18.6) and lowest in Ndiyona (16.6).

Figure 2.6: Median age of the population by area: Kavango East region, Namibia, 2023 Census

2.4. Population density

The population density of Kavango East region was 9.1 persons/km². Rundu Urban recorded the most densely populated constituency (761.4 persons/km²) and Mashare was the least (2.1 persons/km²).

Table 2.2: Population density by area: Kavango East region, Namibia, 2023 Census

Area	Population	Area in km ²	Persons per (km ²)

CHAPTER 3 : BACKGROUND CHARACTERISTICS OF THE POPULATION

This chapter provides information on marital status, citizenship, birth registration, national ID, difficulties in performing activities and functioning, albinism, and orphanhood.

3.1. Marital Status and Age at first marriage

In Kavango East region, 62.9 percent of the male population aged 15 years and above were never married, compared to 57.0 percent of females.

Figure 3.1 Percent population aged 15 years and above by marital status and sex: Kavango East region, Namibia, 2023 Census

The median age at first marriage/ consensual union in Kavango East region was 25.6 years, with males having a higher median age (28.9) than females (23.2) and the same trend was observed across all areas.

Table 3.1: Median age at first marriage/consensual union by sex and area: Kavango East region, Namibia, 2023 Census

3.2. Birth registration, National ID and Death Registration

This section provides information on Namibian birth registration status, national ID and death registration.

3.2.1 Birth registration

This subsection provides information on Namibian birth registration status, which is needed to access social services, such as social grants and educational services.

Slightly over 85 percent of the population in Kavango East region were issued with a birth certificate by Namibian Government. Furthermore, urban areas recorded a high percentage compared to rural areas. Across constituencies, all have recorded a percentage above 80 percent.

Figure 3.2: Percent distribution of population with birth certificate issued by Namibian Government by area: Kavango East region, Namibia, 2023 Census

There were 29.8 percent of children aged 0–4 years without birth certificate in Kavango East region. The percentage of children without birth certificates in rural (36.8%) was significantly higher than urban (24.1%). At constituency level, Mashare (41.8%) had the highest percentage while Rundu Urban (24.3%) had the least.

Figure 3.3: Percent distribution of population aged 0 – 4 years without birth certificate by area: Kavango East region, Namibia, 2023 Census

3.2.2. National Identification document (ID)

This section provides information that determines the coverage of Identification Documents (ID cards) in circulation. There are two types of ID: New blue/pink (issued after independence) and SWA ID (issued before independence).

Over 83 percent of the population aged 16 years and above in Kavango East were issued with a new Namibian ID. Urban areas (87.0%) had a higher percentage of new ID holders compared to rural areas (78.1%). At the constituency level, Rundu Urban (87.1%) had the highest percentage, while Ndiyona (72.9%) had the lowest.

Figure 3.4: Percent distribution of population aged 16 years and above with new Namibian ID by area: Kavango East region, Namibia, 2023 Census

Note: New ID referred to here is the blue ID for Namibian and pink for permanent residents, SWA ID is not included.

3.2.3. Death registration

About 94 percent of deaths reported in Kavango East region were registered. This overall pattern is replicated in all other areas, with the highest reported deaths registered in Mashare (95.3%) and the lowest was recorded in Rundu Rural (91.0%).

Figure 3.5: Registered deaths by area: Kavango East region, Namibia, 2023 Census

3.3. Citizenship

Over 98 percent of the population in Kavango East region were Namibian citizens. A similar pattern is observed for the rest of the areas. In addition, non-Namibian citizens and those with no country of citizenship made up less than 2 percent across all areas.

Figure 3.6: Percent population by citizenship and area: Kavango East region, Namibia, 2023 Census

Note: No country of citizenship means that a person does not officially belong to any country. They don't have the legal status of being a citizen of any country. This situation can happen if someone is stateless, meaning they aren't recognized as a citizen by any country.

Among Namibia's neighboring countries, Angolan nationals accounted for the largest share of non-Namibian citizens enumerated (61.1%). Individuals from Botswana constituted the lowest percentage (1.3%).

6.6. Household assets

Assets ownership is an important indicator of social welfare and living standards, and therefore households that own certain assets depict a certain standard of living. It should be noted that a household can own or have access to one or more assets.

6.6.1. Transportation assets

Motorcars were the most owned transportation asset in Kavango East region, and a similar pattern was observed in both urban and rural households.

Figure 6.6: Percent distribution of households who owned selected transportation assets by area: Kavango East region, Namibia, 2023 Census

6.6.2. Communication assets

Most of the households in Kavango East region owned smartphones (46.5%) followed by radio (37.5%) and television (33.9%). Smartphones (62.7%) were the most owned asset in urban areas while radio (31.4%) was the most owned asset in rural areas.

Figure 6.7: Percent distribution of households that owned selected communication assets by area: Kavango East region, Namibia, 2023 Census

In Kavango East region, 31.7 percent of households had access to mobile internet connectivity, this was the same trend observed in urban and rural areas with 46.7 and 10.8 percent respectively.

Figure 6.8: Percent distribution of households with access to selected communication assets by area: Kavango East region, Namibia, 2023 Census

Note: Access does not include ownership.

6.6.3. Housing Utilities

Electrical/gas stoves (34.1%) followed by refrigerator/freezer (35.8%) were the most owned housing utilities in Kavango East region. This was the same trend observed in urban and areas.

Figure 6.9: Percent distribution of households that owned selected housing utilities by area: Kavango East region, Namibia, 2023 Census

6.7. Type of housing unit

In Kavango East region, 33.3 percent of most households were informal dwellings followed by traditional dwellings (32.3%). However, most households in urban and rural areas were informal (46.8%) and traditional dwellings (69.1%) respectively. It is worth noting that constituencies that are rural mostly had traditional dwellings whereas those that are urban, most households were in formal and informal dwellings.

6.10. Amenities

The section presents information on the main sources of energy, water supply and sanitation, and waste disposal of households.

6.10.1. Source of energy

Information gathered from private households on energy usage for cooking and lighting offers valuable insights into social conditions and development.

Electricity (42.6%) was the highest used main source of energy for lighting, followed by battery lamp/ torch/cellphone (38.6%) in Kavango East region. A similar trend was observed in urban and rural areas. Similarly, battery lamp/torch/cellphone was the most used main source of energy for lighting in all constituencies except for Rundu Urban where households mostly used electricity.

6.10.2. Water Supply and Sanitation

This section covers the main source of water for cooking, drinking, type of toilet facility and means of waste disposal. Inadequate access to safe water and poor sanitation are public health concerns because they create conditions conducive to the spread of diseases. Information on the type of toilet facilities for households was also collected during the census to find out the level of access to proper toilet facilities in the region.

Most of the households (86.2%) in Kavango East region use safe water for cooking. However, the main source of water for cooking was piped water inside (37.4%). Most households in urban areas used piped water inside (48.6%), while in rural areas mostly households used water from boreholes/boreholes with tank covered (28.8%).

ANNEX I : DEFINITION OF CONCEPTS

Dwelling unit

- Dwelling unit is a building/ structure where households live. It's a place of residence occupied by one or more households.
- Sometimes a household can occupy more than one building/ structure. On the other hand, households can occupy only part of the buildings/ structure; in that case, that building/ structure becomes the Dwelling unit for all households within it. Buildings/ structures can be classified into dwelling units, living quarters other than dwelling units (institutions) and non-dwelling units.

Institutions

An institution can be defined as sets of premises in a permanent structure or structures designed to accommodate groups of persons who are bound by either a common public objective or a common personal interests. Institutions can be categorized into two groups, i.e. residential and non-residential institutions.

- Residential institutions include institutions where people may be allowed to reside for certain period of time for learning or employment purposes.
- Non-residential institutions include institutions such as hotel/ lodges, police holding cells hospitals, etc. These groups of people cannot be said to belong to a conventional household since they do not meet the same criteria as that of a household.

Households (Conventional/ Private)

A household usually consists: (1) of one or more persons, related or unrelated, (2) who live together in the same house/ homestead/ compound, but not necessarily in the same dwelling unit, (3) who have the same or common catering or eating arrangements (cook and eat together), and (4) who are answerable to the same head of household.

Homestead

It is an isolated compound with one or more structures and usually inhabited by one or more households. In most cases homesteads will be surrounded by fences, hedges, wall etc. A homestead may contain a traditional dwelling or a group of traditional dwellings. A traditional dwelling will thus be considered a homestead. However, a wall/fence or hedge need not necessarily surround a homestead. For instance, boys' quarters, garage, kitchen etc. may be part of a homestead whether or not they are surrounded by a fence/ wall, etc. During interviews, you will visit homesteads and identify the structures, dwelling units and households in homesteads.

Household members

Refers to all persons who were actually present in the household on the census reference night, including visitors except those attending social events (Birthday parties, weddings, funerals etc.), employees on night shift and resident domestic servants and their families.

Head of household

The head of household is the person of either sex who is looked upon by other members of the household as their leader or main decision-maker. If she/he was absent on the CRN, the next responsible adult member (acting head of household) should be considered as the head.

Note: a head of household should be 12 years and above.

Usual Member

Usual member refers to persons who have been living in the household for 6 months or more, or intend to stay in the household for the next 6 months.

Census Reference Night (CRN)

All interviews must relate to CRN, except for selected parts of the questionnaire, in this case an alternative reference is stated (e.g. some questions in Section E have a reference of last 7 days). The CRN was the night of 24 September 2023.

De Facto

A de-facto method enumerates all persons found within the borders of a particular country at a particular point in time (i.e. CRN).

De Jure

A de jure method interviews all persons who are usually living within the border of a particular country or household, even if they were not present during the time of the census.

Sex ratio

Sex ratio is the proportion of males per 100 females in a given population.

Marital status

Refers to the legal and social status of an individual in relation to marriage. It indicates whether a person is married, never married, divorced, widowed, or in a consensual union (living together as if married/cohabitating).

Median age at first marriage/consensual union

Refers to the age at which half of the persons or a group of persons in a population get married/consensual union for the first time, providing a central point that is less influenced by extreme values.
