FOREWORD

The Government of the Republic of Namibia, through the Namibia Statistics Agency, conducted the fourth Namibia Population and Housing Census in September 2023 with the 24th of September 2023 being the census reference night (CRN). The Population and Housing Census (PHC) is the most comprehensive and reliable national data resource that provides critical input into national development planning and programs. The census further provides data to measure the impact of various development programs embarked upon by Government, NGOs, and other stakeholders in Namibia. The data produced from the 2023 census gave impetus to developing baselines for the national development plans such as the Sixth National Development Plan (6th NDP), and the Vision 2030.

This report highlights key findings from an initial analysis of the 2023 census data, concentrating on the //Karas Region at urban, rural, and constituency levels. The results are essential for guiding the Government, development partners, civil society organizations, and the public on aspects such as the region's population size, population distribution, and population composition among other factors. Also please take note that similar reports for the other thirteen regions were also produced and published.

Please note that some statistical indicators presented in this Regional Profile may differ slightly from those published in the 2023 Census Main Report. These insignificant differences are primarily due to revisions made after the release of the 2023 Census Main report and during further data validation and analysis at the regional level. Users are advised to interpret the figures in these regional reports with this context in mind.

I would like to express our sincere gratitude to all the partners who supported and contributed to the success of the 2023 Namibia Population and Housing Census. This includes the Government of the Republic of Namibia, various Ministries and Government institutions, Mobile Telecommunications Limited (MTC Namibia), Namibian Broadcasting Corporation (NBC), the United Nations Population Fund (UNFPA), United Nations Economic Commission for Africa (UNECA), Statistics South Africa (Stats SA) and the United Kingdom's Office of National Statistics (ONS) for their invaluable support in numerous ways.

I would also like to thank all the field staff including census regional coordinators, IT personnel, assistants, supervisors, and enumerators as well as the NSA staff for their hard work and sacrifice. Lastly, let me express my gratitude to the Namibian people for allowing census staff to visit their households and get information from the members of the households. The census would not have succeeded without the cooperation of the Namibian people.

I finally recommend the invaluable information contained in this regional report of the Namibia Population and Housing Census be used as updated evidence for all decisions and Policymaking for the regional development programs.

CHAPTER 1 : INTRODUCTION

The Namibia Statistics Agency (NSA) is mandated by Part III, Section 7, sub-section 2 (d) of the Statistics Act No.9 of 2011, to conduct Population and Housing Censuses every ten (10) years. This places a legal obligation on all NSA employees and stakeholders involved in the implementation of the Namibia 2023 Population and Housing Census (henceforth referred to as the 2023 Census) to record, process, analyze and disseminate responses received during the 2023 census enumeration truthfully and accurately. The Statistics Act, through Part VIII, Sections 44 and 45 underscores the importance of data security in that all personnel involved in the 2023 Census sign the Oath of Secrecy that ensures data collected in the 2023 Census that could be linked to individuals and households are kept strictly confidential.

The 2023 Census was the fourth undertaking since Namibia's independence in 1990, and the first spatially enabled digital census in the country. The first complete census was conducted in 1991, followed by the second and third censuses, conducted in 2001 and 2011 respectively.

The main objective of the 2023 Census is to provide up-to-date demographic and socio-economic statistical information about the population and their living conditions, necessary for evidence-based planning, decision-making, and policy formulation. The 2023 Census further provides data for monitoring and evaluation of development programs at national, regional, and constituency levels while also providing the indicators to evaluate progress against national and international Agenda such as Vision 2030, National Development Plans (NDPs), Harambee Prosperity Plan, Sectoral Plans, Africa Agenda 2063 and the Agenda 2030 Sustainable Development Goals (SDGs).

The 2023 Census enumeration was carried out over three weeks from 18 September to 06 October 2023. The first week (18 – 23 September 2023) was dedicated to the household listing exercise and thereafter the enumeration of all persons and housing units took place from 24 September to 06 October 2023). The 2023 Census Reference Night (CRN) was the night of the 24 September 2023.

The 2023 Census targeted the population in conventional/private households including those in institutions for example, in school hostels, army/police barracks, hospitals wards, correctional

facilities and special population groups such as the homeless, travelers, sea workers etc. Therefore, the actual population presented in this report reflects the Namibia population on the CRN census in 2023.

This report presents highlights from basic analysis of the 2023 census data and presents results at regional, urban, rural and constituency levels.

1.1. Methodology

The 2023 Census adopted a de facto method of enumeration, which is the enumeration of all persons in the country at a particular point in time. The Census project was implemented in three broad phases as per the international standards and best practices. as follows:

1.1.1. Pre-Enumeration phase

This phase covered census planning, census mapping, census tools development such as questionnaire development, edit rules, scripting of the questionnaire, Computer-Assisted - Personal-Interviews (CAPI) application development and testing, and the like. phase kicked off with the census mapping exercise in October 2019 and concluded with the census pilot in November 2021.

The census mapping, in particular, entails visiting and enumerating all structures in the country including the collection of basic information on their use. The purpose of this exercise was to demarcate the entire country into uniquely defined units known as Enumeration Areas (EAs) in preparation for the census enumeration. A total of 8,738 EAs were demarcated nationally and formed the basis for all census logistics.

Similarly, the census pilot was undertaken to assess the readiness of all census tools, processes and logistical arrangements. The pilot was implemented in 109 purposively selected EAs (54 EAs from urban areas and 55 EAs from rural areas) across the country.

1.1.2. Enumeration phase

The enumeration phase comprised of the finalization of census tools, census publicity and advocacy, recruitment and training of field staff, transport and logistics, listing, main enumeration, and data transmission.

The main enumeration commenced country-wide from 25 September 2023 to 06 October 2023, however, with extensions for final verifications, the fieldwork only concluded officially on 05 November 2023. Three different questionnaires were administered: Form A for Private/conventional households and Form B for Institutional (School hostels, Army barracks, prisons, University hostel, etc.) households and Form C for Special populations (Hospitals - inpatient, hotels, travelers, homeless, etc.). Form A had individual/person records, household records, and mortality records. While Form B only had individual/personal records. In contrast, Form C had only 8 individual/person records.

The deployment comprised of assigning an enumerator to an EA in urban areas, while in rural areas, two enumerators were allocated to an EA in a sweeping mode. These field staff were supported by a team supervisor, constituency supervisor, constituency IT field technician, constituency fleet officer, constituency publicity officer, deputy regional census coordinator, and regional census coordinator. All these levels ensured daily data transmission from the field to the head office server to avoid loss of data.

Finally, to safeguard the quality of the 2023 Census data, a total quality assurance approach based on the Namibia Quality Assurance Framework for Statistics (NQAFS) was adopted. This approach ensured the quality of digital tile packages, printed maps, questionnaires, applications, field manuals, and training of all census staff. The census data quality assurance manual was developed to inform fieldwork procedures, plans, and guidelines. In addition, the census dashboard that extracts data from the central server was developed and used by the data monitoring team to check for data inconsistencies and flag out areas of concern during enumeration.

The summary checks on the data received from the central server were shared with the regional field staff and verification was carried out during data collection to ensure data quality.

Furthermore, the NSA conducted a Post Enumeration Survey (PES) to measure the coverage and content error of census data.

During enumeration, the census situation room was set up at the head office to provide overall management oversight of the enumeration progress using the census dashboard and daily regional reports. This platform provided an opportunity to timely resolve issues and challenges experienced in the field on a daily basis.

1.1.3. Post-Enumeration Phase

The post-enumeration activities include the data processing, release of preliminary results, and thematic analysis and dissemination of census results. The use of technology at all stages of the census enabled timely processing of census data and the production of reports. The quality of the census data can be affirmed by the results of Post Enumeration Surveys.

CHAPTER 2 : POPULATION SIZE, GROWTH AND COMPOSITION

This chapter presents highlights of the population characteristics related to size, growth and composition for //Kharas region based on the 2011 and 2023 census results.

2.1. Population size and Growth

The population of //Kharas region was 109,893 in 2023. More people reside in urban (68,707) than rural (41,186) areas.

Figure 2.1: Population size by urban and rural residence: //Kharas region, Namibia, 2023 Census

Keetmanshoop Urban Constituency had the highest population (27,862) in 2023, while Keetmanshoop Rural constituency had the lowest population (8,744).

Figure 2.2: Population size by constituency: //Kharas region, Namibia, 2023 Census

The population of //Kharas region increased by 41.9 percent between 2011 and 2023. The urban population has increased significantly, by 64.3 percent, whereas the rural population increased by 15.7 percent. While the population increased in all the constituencies, the percentage changes varied significantly, ranging from 6.3 percent in Berseba to 144.1 percent in Karasburg West.

3.2. Birth registration, National ID and Death Registration

This section provides information on Namibian birth registration status, national ID and death registration.

3.2.1 Birth registration

This subsection provides information on Namibian birth registration status, which is needed to access social services, such as social grants and educational services.

Over 95.0 percent of the population in //Kharas region were issued with a birth certificate by the Namibian Government and this pattern is replicated across all areas.

Figure 3.2: Percent distribution of population with birth certificate issued by Namibian Government by area: //Kharas region, Namibia, 2023 Census

There were 7.3 percent of children aged 0-4 years without birth certificate in //Kharas region. The percentage of children without birth certificates in rural (9.3%) was significantly higher than urban (6.0%). At constituency level, !NamiǀNûs (10.1%) and Karasburg West (10.1%) had the highest percentage while Karasburg East (4.6%) had the least.

Figure 3.3: Percent distribution of population aged 0 – 4 years without birth certificate by area: //Kharas region, Namibia, 2023 Census

3.2.2. National Identification document (ID)

This section provides information that determines the coverage of Identification Documents (ID cards) in circulation. There are two types of ID: New blue/pink (issued after independence) and SWA ID (issued before independence).

95.1 percent of the population aged 16 years and above in //Kharas region were issued with a new Namibian ID. Rural area (95.6%) had a slightly higher percentage of individuals issued with a new Namibian ID compared to urban areas (94.8%). At the constituency level, Karasburg West (97.4%) had the highest percentage, while Keetmanshoop Rural (92.4%) had the lowest.

Figure 3.4: Percent distribution of population aged 16 years and above with new Namibian ID by area: //Kharas region, Namibia, 2023 Census

Note: New ID referred to here is the blue ID for Namibian and pink for permanent residents, SWA ID is not included.

3.2.3. Death registration

Over 95.0 percent of deaths reported in the 12 months preceding the CRN in the //Kharas region were registered. This overall pattern is replicated in all areas, with all reported deaths in Karasburg East constituency registered.

Figure 3.5: Registered deaths by area: //Kharas region, Namibia, 2023 Census

3.3. Citizenship

Over 97.0 percent of the population in //Kharas were Namibian citizens. A similar pattern is observed for the rest of the areas, except with Karasburg East which is below national with 95.7 percent. In addition, non-Namibian citizens made up less than 2.0 percent across all areas.

Figure 3.6: Percent population by citizenship and area: //Kharas region, Namibia, 2023 Census

Note: No country of citizenship means that a person does not officially belong to any country. They don't have the legal status of being a citizen of any country. This situation can happen if someone is stateless, meaning they aren't recognized as a citizen by any country.

Among Namibia’s neighboring countries, South African nationals accounted for the largest share of non-Namibian citizens enumerated (50.3%). Individuals from Botswana constituted the lowest percent with 0.7 percent.

4.5. Labour Force Characteristics

The 2023 PHC adopted the ICLS 19 resolution 1 standard questions as set up by the ILO to measure the economic activity status. The 19th ICLS was to update the previous standards on statistics of the economically active population, employment, and unemployment (13th ICLS, 1982) by setting up a new framework for work and labor market statistics. This section provides an overview of economic activity. Detailed statistics are presented in the Namibia 2023 Labour Force thematic report.

In //Kharas region, 70.3 percent of the population in labour force were employed, while 29.7 percent were unemployed. It is important to highlight that a significant percentage (95.1%) of the potential labour force were discouraged jobseekers.

Figure 4.10: Population aged 15 years and above by activity status: //Kharas Region, Namibia, Census 2023

4.6. Urbanization

The level of urbanization indicates the relative number of inhabitants in urban areas compared to rural areas.

The urbanization level increased by 8.5 percentage points from 54.0 percent in 2011 to 62.5 percent in 2023 in //Kharas region.

Figure 4.11: Urbanization level by Census year (2011 and 2023): //Kharas Region, Namibia, Census 2023

Out of all the 8 urban localities in //Kharas region, Keetmanshoop was the most populous town across all two census years with 19,447 and 27,862 persons in 2011 and 2023, respectively. Oranjemund (98.0%) had the highest population increase, while Berseba (26.5%) had the lowest population increase.

CHAPTER 5 : POPULATION DYNAMICS

This chapter analyses component of population change: fertility and mortality, presented at regional, urban/rural and constituency levels.

5.1. Fertility

This section presents the basic direct fertility indicators such as Crude Birth Rate (CBR), age at first live birth and birth delivery assistance for women aged 15 – 49 years.

5.1.1. Crude Birth Rate (CBR)

Women in //Kharas region gave birth to 2,923 babies in the year preceding the census, and this is equivalent to the CBR of 26.6 births per 1,000 population. The CBR in urban was 23.6 while in rural areas it was higher at 31.6 births per 1,000 population. However, significant variations were observed across the constituencies, the highest being Karasburg West (38.4 births per 1,000 population) and the least being Berseba (19.5 births per 1,000 population).

Table 5.1: CBR by area: //Kharas region, Namibia, 2023 Census

Area	Population	Births	CBR
//Kharas	109 893	2 923	26.6
Urban	68 707	1 622	23.6

Keetmanshoop Urban	27 862	657	23.6
Oranjemund	13 224	272	20.6

5.1.2. Median age at First Live Birth

The median age of mother at first live birth in //Kharas region was 21.0 years. Mothers in rural areas gave birth at a younger age (20.6 years) compared to mothers in urban (21.3 years) areas. At constituency level, the median age at first live birth was lowest in Karasburg West (20.4 years) and highest in Oranjemund (21.9 years).

Figure 5.1: Median age of mother at first live birth by area: //Kharas region, Namibia, 2023 Census

5.1.3. Birth Delivery Assistance

Over 96.0 percent of the births in //Kharas region was attended by medical professionals (Medical doctors or nurse/midwives) and this overall pattern is replicated in all areas, except Berseba constituency which had about 94.1 percent of births attended by medical professionals.

Figure 5.2: Percent distribution of births by type of delivery and area: //Kharas region, Namibia, 2023 Census

5.2. Mortality

This section provides information on deaths that occurred in the household in the last 12 months (October 2022 to September 2023) as well as the direct estimates of Crude Death Rates (CDR) which portray the overall mortality pattern in the country.

5.2.1. Crude Death Rate (CDR)

There were 849 deaths reported in the year preceding the census which gives a CDR of 7.7 deaths per 1,000 population in //Kharas region. The CDR was higher in urban (8.1 deaths per 1,000 population) than rural areas (7.1 deaths per 1,000 population). The highest CDR was recorded in Berseba (13.8 deaths per 1,000 population) while the lowest was in Oranjemund (3.8 deaths per 1,000 population).

Table 5.2: CDR by area: //Kharas region, Namibia, 2023 Census

ANNEX I: DEFINITION OF CONCEPTS

Dwelling unit

- Dwelling unit is a building/ structure where households live. It's a place of residence occupied by one or more households.
- Sometimes a household can occupy more than one building/ structure. On the other hand, households can occupy only part of the buildings/ structure; in that case, that building/ structure becomes the Dwelling unit for all households within it. Buildings/ structures can be classified into dwelling units, living quarters other than dwelling units (institutions) and non-dwelling units.

Institutions

An institution can be defined as sets of premises in a permanent structure or structures designed to accommodate groups of persons who are bound by either a common public objective or a common personal interest. Institutions can be categorized into two groups, i.e. residential and non-residential institutions.

- Residential institutions include institutions where people may be allowed to reside for certain period of time for learning or employment purposes.
- Non-residential institutions include institutions such as hotel/lodges, police holding cells hospitals, etc. These groups of people cannot be said to belong to a conventional household since they do not meet the same criteria as that of a household.

Households (Conventional/ Private)

A household usually consists: (1) of one or more persons, related or unrelated, (2) who live together in the same house/ homestead/ compound, but not necessarily in the same dwelling unit, (3) who have the same or common catering or eating arrangements (cook and eat together), and (4) who are answerable to the same head of household.

Homestead

It is an isolated compound with one or more structures and usually inhabited by one or more households. In most cases homesteads will be surrounded by fences, hedges, wall etc. A homestead may contain a traditional dwelling or a group of traditional dwellings. A traditional dwelling will thus be considered a homestead. However, a wall/ fence or hedge need not necessarily surround a homestead. For instance, boys' quarters, garage, kitchen etc. may be part of a homestead whether they are surrounded by a fence/ wall, etc. During interviews, you will visit homesteads and identify the structures, dwelling units and households in homesteads.

Household members

Refers to all persons who were present in the household on the census reference night, including visitors except those attending social events (Birthday parties, weddings, funerals etc.), employees on night shift and resident domestic servants and their families.

Head of household

The head of household is the person of either sex who is looked upon by other members of the household as their leader or main decision-maker. If she/he was absent on the CRN, the next responsible adult member (**acting head of household**) should be considered as the head.

***Note:** a head of household should be 12 years and above.*

Usual Member

Usual member refers to persons who have been living in the household for 6 months or more or intend to stay in the household for the next 6 months.

Census Reference Night (CRN)

All interviews must relate to CRN, except for selected parts of the questionnaire, in this case an alternative reference is stated (e.g. some questions in Section E have a reference of last 7 days). The CRN was the night of 24 September 2023.

De Facto

A de-facto method enumerates all persons found within the borders of a particular country at a particular point in time (i.e. CRN).

De Jure

A de jure method interviews all persons who are usually living within the border of a particular country or household, even if they were not present during the time of the census.

Sex ratio

Sex ratio is the proportion of males per 100 females in a given population.

Marital status

Refers to the legal and social status of an individual in relation to marriage. It indicates whether a person is married, never married, divorced, widowed, or in a consensual union (living together as if married/ cohabitating).

Median age at first marriage/ consensual union

Refers to the age at which half of the persons or a group of persons in a population get married/consensual union for the first time, providing a central point that is less influenced by extreme values.

Albinism

Is a rare, non-contagious, genetically inherited condition characterized by reduced or no melanin production, resulting in light skin, hair, and eyes, vision impairment, and sensitivity to sunlight (WHO).

Orphanhood

Refers to persons aged 17 years and below who have lost either one or both parents.

Literacy

Is the ability to read and write with understanding in any language. All persons aged 15 years and above were asked whether they can read and write in any language with understanding, but no test was administered to determine the level of literacy.

Formal education

Refers to any regular formal educational institution, public or private for systematic of any level of education.

School attendance

Is defined as a full-time attendance at any regular educational institution, public or private, for systematic instruction for longer than a year.

School enrolment

Refers to the school-going population aged 6 to 24 years who were attending school, excluding those attending adult education.

Educational attainment

Refers to the highest level of education completed (refers to a complete cycle whether it was pass or fail).

Household size

Is the average number of persons in the household.

Head of household

Is a person, of either sex who is looked upon by other members of the household as their leader or main decision-maker.

Tenure

Refers to the conditions that govern individuals' rights to occupy dwelling units
