

BEVERAGES

SEPTEMBER 2025

Chart 1: Beverage Production Composite Index, Percentage Change¹

- **Beverage Production Composite Index**, which comprises both alcoholic and non-alcoholic beverages, grew by 8.3 percent in September 2025, a significant slowdown compared to the 90.7 percent increase recorded in August 2025. On a year-on-year basis, the index rose by 5.4 percent (Chart 1).
- The month-on-month increase was mainly driven by higher production levels of alcoholic beverages.
- In terms of beverage production volume, total output stood at 382 787 hectoliters in September 2025, representing an increase compared to 353 386 and 363 266 hectoliters recorded in August 2025 and September 2024 respectively.

Chart 2: Alcoholic Beverage Production Index, Percentage Change

- The **Alcoholic Beverage Production Index** increased by 19.5 percent month-on-month in September 2025, following a 15.4 percent rise in August 2025. On an annual basis, the index recorded a 12.3 percent increase (Chart 2).

¹ Chart 1 is limited to -40 and 60 percent for better readability.

Chart 3: Non-Alcoholic Beverage Production Index, Percentage Change²

- The **Non-Alcoholic Beverage Production Index** recorded a month-on-month decline of 4.3 percent in September 2025, in contrast to the 617.9 percent surge observed in August 2025. On a year-on-year basis, the index also decreased by 3.1 percent (Chart 3).

Chart 4: Beverage Export Composite Index, Percentage Change³

- The **Beverage Export Composite Index** declined by 14.1 percent in September 2025, following a 47.4 percent increase in the previous month. On an annual basis, the index fell by 61.1 percent (Chart 4).
- During the review period, a total of 22 339 hectoliters of beverages were exported, down from 26 019 hectoliters recorded in the previous month and 57 487 hectoliters in September 2024.

² Chart 2 is limited to -50 percent and 50 percent for better readability.

³ Chart 4 is limited to 100 percent for better readability.

Chart 5: Export of Beverage by Partner Country, Percentage Share

- During the review period, South Africa remained Namibia’s leading export market for beverages, accounting for 56.0 percent of total beverage exports in hectoliters (HL). Tanzania ranked second with 23.9 percent, followed by Zambia with 7.7 percent, while the Democratic Republic of Congo (DRC) placed fourth with a 3.9 percent share of total beverage exports.

Chart 6: Beverage Import Composite Index, Percentage Change⁴

- The **Beverage Import Composite Index** contracted by 19.4 percent month-on-month in September 2025, compared to a 16.1 percent increase recorded in the previous month. On a year-on-year basis, the index declined by 22.6 percent (Chart 6).
- In September 2025, Namibia imported 97 430 hectoliters of beverages, down from 120 935 hectoliters in August 2025. Additionally, this also reflects a decrease compared to the 125 869 hectoliters recorded in September 2024.

⁴ Chart 6 is limited to 60 percent for better readability.

Chart 7: Import of Beverage by Partner Country, Percentage Share

- In September 2025, South Africa remained the dominant source of Namibia’s beverage imports, accounting for 87.0 percent of the total volume in hectoliters (HL). Germany followed in second place with 8.0 percent, while Zambia and Angola ranked third and fourth, contributing 2.6 and 0.9 percent, respectively (Chart 7).

Methodology:	Products are classified according to the Harmonized System (HS) nomenclature classification (Manufacture of Beverages) and using graphical and tabular analysis.
Data Sources:	The data sources for volume in Hectolitres of beverage are sourced from Namibia Breweries, Coca-Cola Namibia Bottling Company, ABInBev Namibia (SAB Miller Namibia at Okahandja) and Trade data from NamRA. This is data on the production of alcoholic beverage (beer production) and non-alcoholic beverage (soft drinks). Alcoholic beverage production is the total of alcoholic beverage produced by Namibia Breweries and ABInBev Namibia. Whereas non-alcoholic beverage production data was a sum of soft drinks produced by Namibia Breweries and Namibia Beverage. The unit of measure is Hectolitre (hl).
Base year:	The beverage sectoral report is harmonised with the quarterly and annual National Accounts base year 2015.
Index calculations:	The index of beverage production was weighted using the volume data of 2015. The index is then calculated as a ratio of the volume of a specific component in a specific month to the total volume of that component in 2015.
Conversion:	1 basis point = 0.01 percent
Revision:	Data was revised based on the new dataset received from the data sources.
