

ELECTRICITY

February 2026

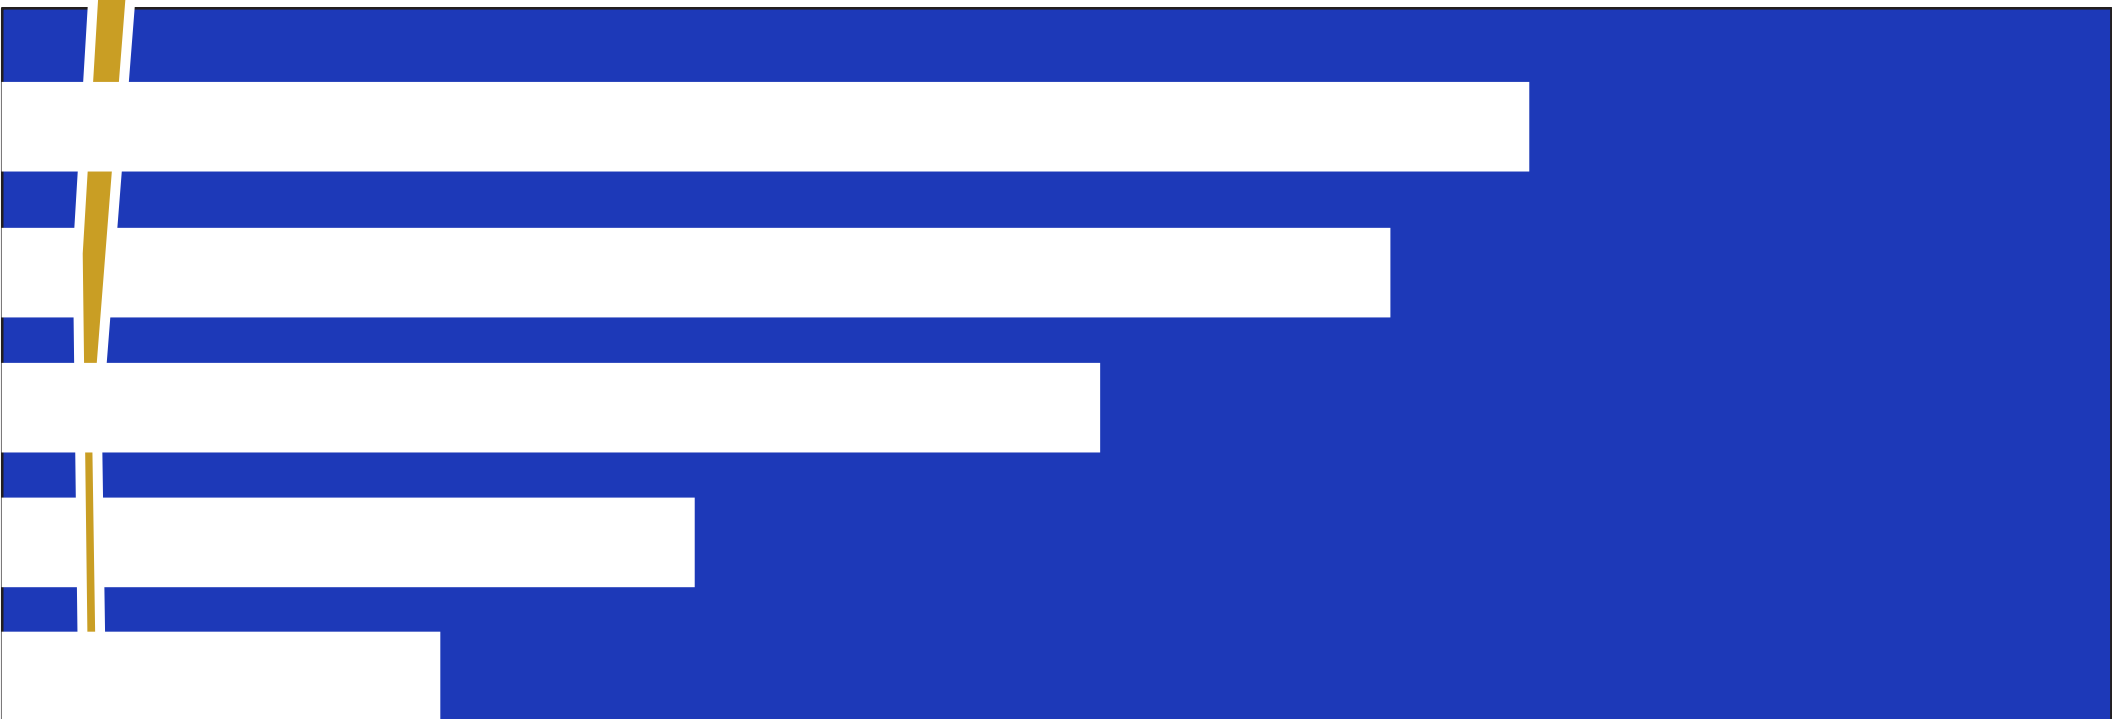

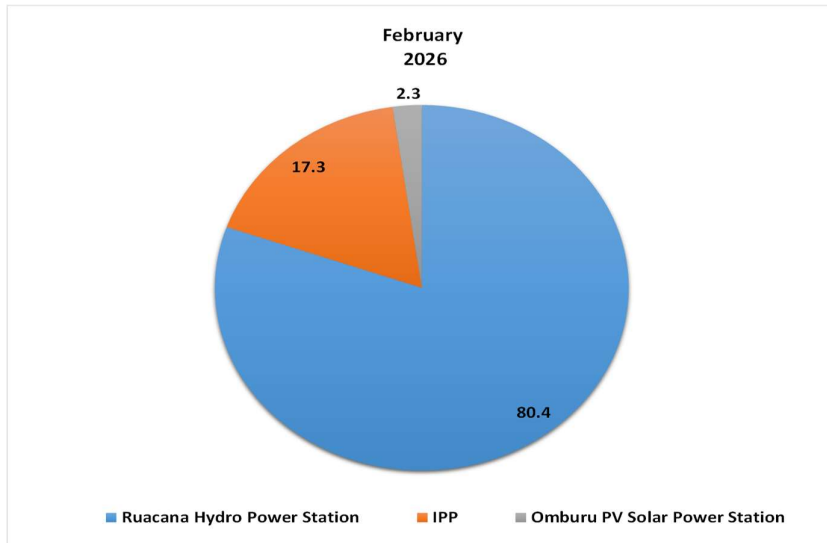

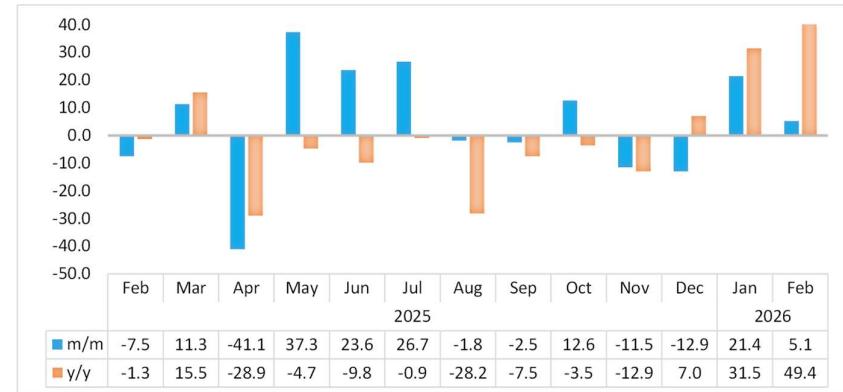

Chart 3: Share of Electricity for Own Generation, in Percent

- In February 2026, total local electricity generation amounted to 194 110 MWh. The Ruacana Hydro Power Station was the main contributor, producing 156 057 MWh (80.4 percent), followed by Independent Power Producers (IPPs) with 33 653 MWh (17.3 percent). The Omburu PV Solar Power Station supplied 4 400 MWh, accounting for 2.3 percent of local generation.
- In contrast, the Van Eck Coal Power Station, Anixas 1 Diesel Power Station, and Anixas 2 Diesel Power Station did not generate any electricity during the period under review (Chart 3).

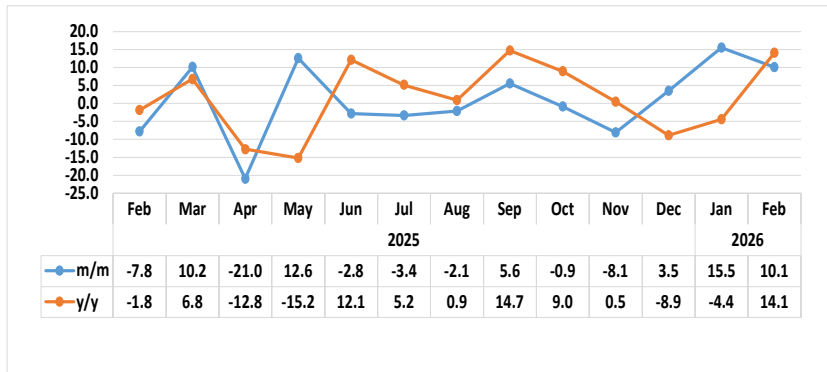

Chart 4: Electricity Import Index, Percentage Change¹

- The **Electricity Import Index** in February 2026 moderated, recording a month-on-month increase of 5.1 percent, down from 21.4 percent rise in the preceding month. On a year-on-year basis, the index grew by 49.4 percent (Chart 4).
- In absolute terms, Namibia imported a total of 256 624 MWh of electricity in February 2026.
- South Africa remained the largest supplier of Namibia’s electricity imports, accounting for 48.0 percent of the total electricity imports. Followed by Zambia with 31.9 percent and Zimbabwe with 15.0 percent. The “Eskom Orange River” and the “Day-Ahead Market (SAPP)” ranked fourth and fifth, contributing 3.9 and 1.3 percent of electricity imports, respectively.

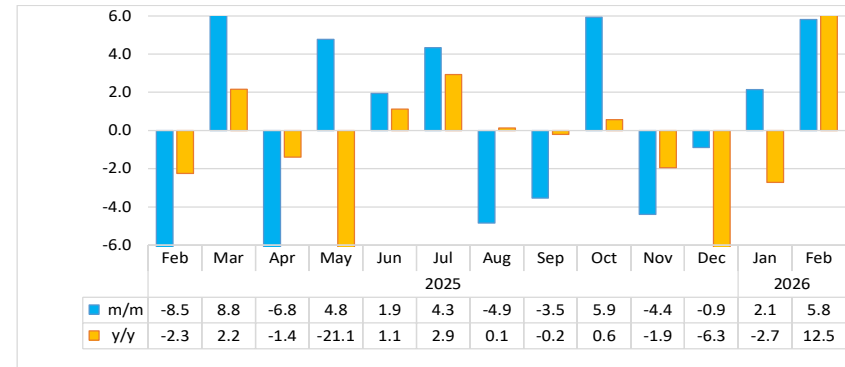

¹ This chart is limited to 40 percent for better readability.

Chart 5: Electricity Sales Composite Index, Percentage Change

- The **Electricity Sales Composite Index** rose by 10.1 percent month-on-month in February 2026, following a 15.5 percent increase in January 2026. On a year-on-year basis, the index also grew by 14.1 percent (Chart 5).
- In volume terms, electricity sales totalled 441 850 MWh in February 2026, exceeding both 401 323 MWh sold in January 2026, and 387 133 MWh recorded in February 2025.

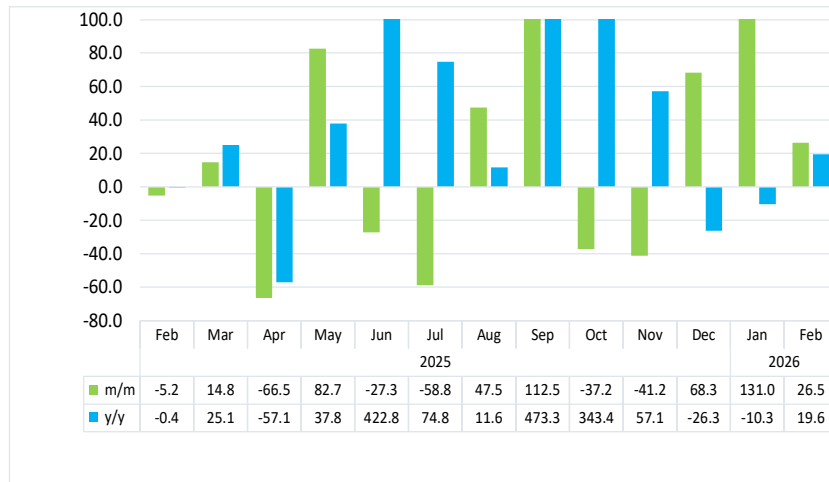

Chart 6: Electricity Domestic Sales Index, Percentage Change²

- The **Domestic Electricity Sales Index** increased by 5.8 percent in February 2026, following a 2.1 percent rise in January 2026. On a year-on-year basis, the index grew by 12.5 percent (Chart 6).
- Total domestic electricity sales reached 336 402 MWh in February 2026, up from 317 935 MWh sold in the previous month and higher than 298 987 MWh recorded in February 2025. The largest share of domestic consumption was by Redistributors – LPU (66.7 percent), followed by the Mining sector (26.4 percent) and Eskom Orange River (3.0 percent).
- Electricity sales to Farms (Main Supply) accounted for 1.2 percent of domestic consumption, while the “Water Pumping” and “Commercial – LPU” categories ranked fifth and sixth, contributing 0.9 and 0.8 percent, respectively.

² This chart is limited to -6 and 6 percent for better readability.

Chart 7: Electricity Export Sales Index, Percentage Change³

- The **Electricity Export Sales Index** eased in February 2026, recording a 26.5 percent increase compared to the substantial 131.0 percent rise in January 2026. Despite the slower month-on-month growth, the index increased by 19.6 percent compared to February 2025 (Chart 7).
- During the review period, Namibia exported a total of 105 448 MWh of electricity. The vast majority (98.0 percent) was sent to STEM Sales – SAPP. Botswana was the second-largest export market with 1.0 percent share, while South Africa and Angola accounted for 0.5 and 0.4 percent of total electricity exports, respectively.

³ This chart is limited to 100 percent for better readability.

Methodology : Graphical and tabular analysis

Data Sources : The data source for the volume of electricity is sourced from Nam-power. These are data on domestic and export sale, Own Generation and import sources. The Production is in kilowatts per hour (kWh) for all the variables.

Index calculation: The index of sales and sources weighted uses the volume data of 2015.

Conversion : 1 basis point = 0.01 percent
