Methodology : Products are classified according to the Harmonized System (HS) nomenclature classification (chart 9 and 11)

Data source : The volume data for rail cargo are sourced from Trans-Namib, while the source for road and air cargo volume data is from the Namibia Statistics Agency (Trade Statistics Sub-division). Volumes of Sea cargo, which comprises of sea-landed, sea-shipped, and sea Trans-shipped, are sourced from Namport.

Index calculation : The index of cargo has been weighted using the volume data in tonnes for 2015.

Conversion : 1 basis point = 0.01 percent

Revision : Please note that this monthly report excludes the **Terminal Investment Limited (TIL) containerized cargo** statistics for **April 2026**, as the updated datasets for cargo handled at the **TIL facility operating at Walvis Bay Harbour** were not yet available at the time of publication. Furthermore, the **containerized cargo data handled by TIL at Walvis Bay Harbour** were only available in raw format and had not yet been fully processed for inclusion in this report. The report will therefore be updated to incorporate the April 2026 TIL data in the May 2026 publication.
