Chart 2: Share of Sources of Electricity, in Percent

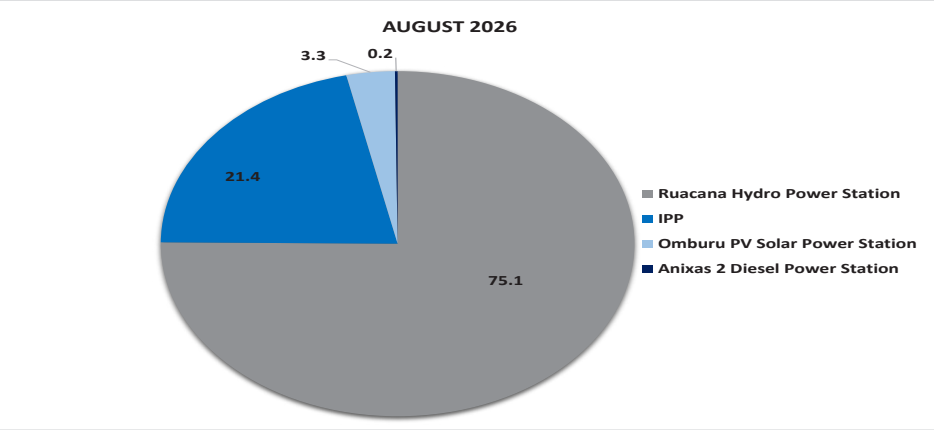

- The **Electricity Sources Composite Index**, based on domestic electricity generation and electricity imports, declined by 5.0 percent month-on-month in August 2026, following a 5.8 percent contraction recorded in July 2026. On a year-on-year basis, however, the index increased by 9.0 percent, compared to a 22.2 percent decline experienced in August 2025 (Chart 1).

- During the month under review, total electricity supplied to the domestic economy stood at 413 763 MWh, down from 435 543 MWh supplied in July 2026 but higher than 379 696-MWh recorded in August 2025. This represents a month-on-month decline and a year-on-year increase in total electricity supplied.

- In August 2026, domestic electricity generation accounted for 35.0 percent of total electricity supplied to the domestic economy, amounting to 144 625 MWh, while electricity imports contributed the remaining 65.0 percent, equivalent to 269 137 MWh. This composition remained broadly consistent with July 2026 and August 2025, whereby electricity imports accounted for the largest share of total electricity supply.

[1] Chart 1 is limited to 25 percent for better readability.

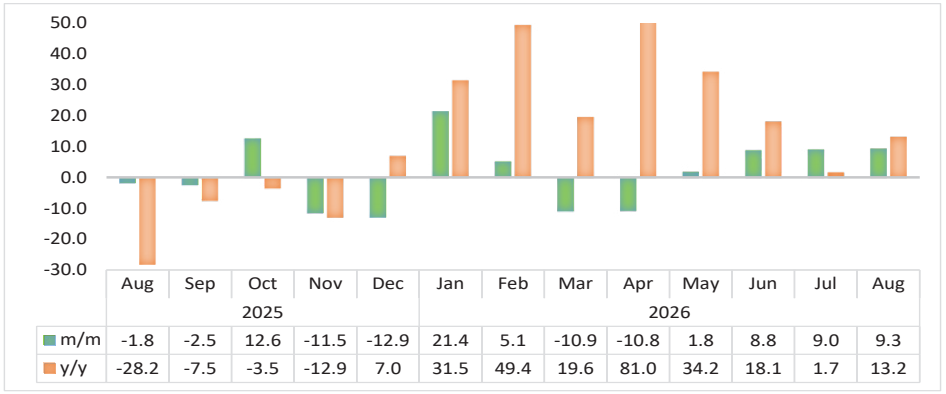

Chart 3: Share of Electricity for Own Generation, in Percent

- In August 2026, total domestic electricity generation amounted to 144 625 MWh. The Ruacana Hydro Power Station remained the largest source, generating 108 656 MWh, equivalent to 75.1 percent of total domestic output. Independent Power Producers (IPPs) were the second-largest source, contributing 30 939 MWh (21.4 %), followed by Omburu PV Solar Power Station, which generated 4 771 MWh (3.3 %). The Anixas 2 Diesel Power Station contributed the smallest share among the active generation sources, producing 259 MWh (0.2 %) of total domestic output (Chart 3).

- In contrast, Van Eck Power Station and Anixas 1 Diesel Power Station recorded no electricity generation during the period under review.

- The **Electricity Import Index** grew by 9.3 percent month-on-month in August 2026, following a 9.0 percent increase recorded in July 2026. On a year-on-year basis, the index also increased by 13.2 percent, compared to a 28.2 percent contraction experienced in August 2025 (Chart 4).

- In volume terms, Namibia imported a total of 269 137 MWh of electricity during the month under review.

- Eskom Aggeneis of South Africa remained Namibia's largest source of imported electricity, accounting for 46.3 percent of total electricity imports. ZESCO Limited of Zambia followed with 32.9 percent share, while the Zimbabwe Power Company (ZPC) contributed 16.5 percent of total electricity imports. Eskom Orange River accounted for the remaining 4.3 percent of total electricity imports. Meanwhile, the Southern African Power Pool (SAPP) Day-Ahead Market recorded no electricity imports to Namibia during the month under review.

- The **Electricity Sales Composite Index** increased by 5.1 percent month-on-month in August 2026, reversing the 4.3 percent decline recorded in July 2026. On an annual basis, the index grew by 20.2 percent, compared to a marginal 0.9 percent increase recorded in August 2025 (Chart 5).

- In absolute terms, total electricity sales reached 419 414 MWh in August 2026, up from 399 123 MWh sold in July 2026, representing an increase of 20 291 MWh. Electricity sales also remained substantially higher than 348 831 MWh recorded in August 2025, this reflects increases on both a month-on-month and year-on-year basis.

Chart 6: Electricity Domestic Sales Index, Percentage Change[3]

	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug
			2025						2026

- The **Domestic Electricity Sales Index** declined by 0.8 percent month-on-month in August 2026, reversing 4.6 percent growth noted in the previous month. On a year-on-year basis, however, the index increased by 1.5 percent, compared to a marginal 0.1 percent increase recorded in August 2025 (Chart 6).

- In volume terms, domestic electricity sales totalled 326 354 MWh in August 2026, slightly down from 328 991 MWh sold in July 2026 but higher than 321 495 MWh recorded in August 2025. Redistributors – LPU remained the largest consumers of domestically supplied electricity, accounting for 67.3 percent of total domestic electricity sales, followed by the mining sector at 24.9 percent and Eskom Orange River with 3.5 percent.

- Farms under the main supply category accounted for 1.3 percent of total domestic electricity sales, while "Plots and Miscellaneous Properties" and "Commercial – LPU" ranked fifth and sixth, respectively, each contributing 0.8 percent of total domestic electricity sales during the period under review.

- The **Electricity Export Sales Index** increased by 32.7 percent month-on-month in August 2026, reversing the 31.6 percent decline experienced in July 2026. Year-on-year, the index surged by 240.4 percent, compared to 11.6 percent increase recorded in the same month of 2025 (Chart 7).

- In volume terms, Namibia exported 93 061 MWh of electricity during the month under review. Southern African Power Pool (SAPP) STEM Sales remained the leading destination for Namibia's electricity exports, accounting for 97.6 percent of total electricity exports, followed by Botswana Power Corporation with 1.3 percent. Eskom (Rietfontein Interconnection, South Africa) and Angola accounted for 0.6 and 0.5 percent, respectively of total electricity export sales.

Methodology : Graphical and tabular analysis

Data Sources : The data source for the volume of electricity is sourced from NamPower. These are data on domestic and export sale, Own Generation (local production) and import sources. The Production is in Kilowatts per hour (kWh) for all the variables.

Index calculation: The index of sales and sources weighted uses the volume data of 2015.

Conversion : 1 basis point = 0.01 percent
