Methodology: Products are classified according to the Harmonized System (HS) nomenclature classification (Manufacture of Beverages) and using graphical and tabular analysis

***Data Sources*:** The data sources for volume in Hectolitres of beverage are sourced from Namibia Breweries, Coca-Cola Namibia Bottling Company, ABInBev Namibia (SAB Miller Namibia at Okahandja) and Trade data from NamRA. This is data on the production of alcoholic beverage (beer production) and non-alcoholic beverage (soft drinks). Alcoholic beverage production is the total of alcoholic beverage produced by Namibia Breweries and ABInBev Namibia. Whereas non-alcoholic beverage production data was a sum of soft drinks produced by Namibia Breweries and Namibia Beverage. The unit of measure is Hectolitre (hl).

***Base year*:** The beverage sectoral report is harmonised with the quarterly and annual National Accounts base year 2015.

***Index calculations*:** The index of beverage production was weighted using the volume data of 2015. The index is then calculated as a ratio of the volume of a specific component in a specific month to the total volume of that component in 2015.

***Conversion*:** 1 basis point = 0.01 percent
